SUBJECT INDEX

Abrin
  Detection of abrin, 1868
  Ricin and abrin in beverages, 1875
Acaricidal activity
  T. vulgaris and a stored food mite, 351
Acetic acid
  Survival of *E. coli* O157:H7 in acid, 2404
Acid
  Altered cell composition in stress-adapted *L. innocua*, 182
Acid adaptation
  L. monocytogenes on salami during storage, 494
Acid adapted
  Salmonella in tomatoes, 1572
Acidic
  Evaluation of a copper sulfate–based commercial disinfectant, 226
Acidified sodium chlorite
  Acidified sodium chlorite treatment of trout fillets, 973
  Antimicrobial interventions for leafy greens, 625
Acid resistance
  Survival of *L. innocua* in dairy products, 742
Acid stress
  L. monocytogenes sprout colonization and stress response, 1556
  Listeria inactivation affected by sequences of stresses, 1169
Activation energy
  Storage stability of freeze-dried lactic acid bacteria, 431
Active packaging
  Active packaging, 119
Acute safety study
  Acute toxicity of rosemary extracts, 790
Adaptation
  Contribution of sigma B factor in alkali tolerance in *L. monocytogenes*, 1481
  Low-salinity stress in *V. vulnificus*, 416
Adhesion
  L. monocytogenes adhesion and viability, 1379
  Xylitol to reduce microbial adhesion, 405
Adsorption
  Virus adsorption to lettuce, 522
Advanced meat recovery
  Detection of DRG in advanced meat recovery product, 2307
Advanced oxidation technologies
  Water disinfection from the fresh-cut vegetable industry, 286
Aerobic bacteria colony counts
  Risk factors for *Salmonella* and hygiene indicators in pig slaughterhouses, 1320
Aerobic colony counts
  Hygiene indicator criteria for meat in Belgium, 35
Aerobic plate count (APC)
  Aerobic plate counts as a measure of HACCP effectiveness, 1248
  Effect of incubation temperature on APCs, 373
  Grouping of food isolated bacteria by PCR-SSCP in food, 839
Aeromonas
  Multiplex PCR detection of enterotoxin genes in *Aeromonas* spp., 2094
Agricultural water
  On-farm contamination of persimmons, 52
AI-2
  Identification of AI-2 inhibitors from ground beef, 134
ail gene
  Prevalence of *Y. enterocolitica*, 1162
Air
  Evaluation of a copper sulfate–based commercial disinfectant, 226
Airborne contamination
  Control of airborne microorganisms in meat processing, 1922
Air-dried sausage
  Detection of *S. aureus*, 191
Alfalfa sprouts
  Growth of *Salmonella* during sprouting, 888
  16S rDNA profiling of alfalfa sprouts–associated bacteria, 200
Alginate-based coating
  Essential oils in coatings for fresh-cut apples, 1150
Alkaline phosphatase
  Alkaline phosphates in cow's, goat's, and sheep's milk, 1884
Alkaline stress
  Contribution of sigma B factor in alkali tolerance in *L. monocytogenes*, 1481
Allergen(s)
  Allergen release by frozen and chilled *Anisakis*, 2578
  Anisakis antigens in fish muscle, 1273
  Cleaning and validation to prevent allergen cross-contact, 445
Allergic reactions
  Latex glove use by food handlers, 2334
Allergic thresholds
  Approaches to establish thresholds, 1043
Almonds
  Decontamination of almonds with infrared heat, 897
  Microbiology of raw nuts, 402
  Reduction of *Salmonella* Enteritidis on almonds by high-pressure water, 825
  Salmonella migration into almonds, 397
Alternaria
  Alternaria toxins in wheat, 1262
Amidation
  Bactericidal effect of lactoferrin and its derivatives, 2468
Amygdalin
  Enzyme immunoassay for detection for amygdalin, 2048
Analysis
  Analysis of shellfish for *Cryptosporidium* and *Giardia*, 959
Animal constituents
  Microscopic method for animal constituents detection in feedstuffs, 578
Animal feed
  Developing group-specific primers, 2257
Anisakis simplex
  Allergen release by frozen and chilled *Anisakis*, 2578
  Anisakis antigens in fish muscle, 1273
Ani s 4
  Anisakis antigens in fish muscle, 1273
Anodic electrolyzed water
  Shelf life of coated and semifried tuna, 770
Anthrax
  Inactivation of *B. anthracis* in milk, 333
Antiadhesive
  Inhibition of pathogen adhesion, 2272
Antibacterial
  Antibacterial activity of xanthorrhizol, 1926
Antibacterial activity
  Influence of extraction methods on *N. sativa* essential oils, 2475
  Q. infectoria as anti–*E. coli* agent, 1223
Antibacterial enzymes
  Antibacterial milkfat globule membrane fractions, 126
Antibacterial milk peptides
  Antibacterial milkfat globule membrane fractions, 126
Antibacterial peptide
  Expression of goat lactoferricin from *E. coli*, 2523
Antibiotic(s)
  Antibiotic-resistant bacteria in herbal products, 1486
  Antibiotics in milk, 1193
  Salmonella prevalence in bovine lymph nodes, 1685
  Sulfamethazine water medication pharmacokinetics and contamination, 584
Antibiotic residues
  Antibiotics in milk, 1193
  Distribution of drug residues in breast muscle tissues, 223
Antibiotic resistance
  Antibiotic resistance in *V. parahaemolyticus*, 2552
  Enterococcal contamination of food by houseflies, 435
  Enterococci from human patients and foods, 2100
  Multidrug-resistant *Salmonella*, 27
  Regulation of safety of probiotics, 1734

S. aureus and Domiati cheese, 2567
Antibiotic resistant
Inactivation of antibiotic-resistant *Campylobacter*, 1145
Antifungal activity
Antifungal activity of *L. paracasei*, 2213
Antigen-binding fragment (Fab)
Enzyme immunoassay for detection for amygdalin, 2048
Antigenicity
Immunoreactivity of irradiated milk and whey samples, 1270
Antiinfective
Inhibition of pathogen adhesion, 2272
Antimicrobial(s)
Antimicrobial activity of *D. salina* extracts, 2138
Antimicrobial efficacy and sensory acceptability of plant essential oils, 1846
Cold plasma sanitizing of apples, 1357
Control of *L. monocytogenes* on frankfurters, 728
E. coli inhibition by colicin E1, 2519
Effects of interventions on MDR *Salmonella*, 2177
Enterococci in spontaneous sausage fermentation, 1244
Essential oils in coatings for fresh-cut apples, 1150
HPP in combination with antimicrobials, 820
Peracetic acid mixture as an antimicrobial treatment in poultry, 1119
Poultry skin flora after successive washings, 1707
Antimicrobial activities
Natural antimicrobial combinations against *L. monocytogenes*, 2105
Antimicrobial activity
Antibacterial activity of mushroom extracts, 1701
Antibacterial milkfat globule membrane fractions, 126
Antimicrobial activity of lactoferrin, 319
Antimicrobial essential oils against *L. monocytogenes* in pork, 502
Antimicrobial effect
Antibacterial activity of dextran-conjugated lysozyme in cheese curd, 411
Antibacterial effects of polyphosphates, 1401
Antimicrobial ice
Extending shelf life of fish, 218
Antimicrobial polymer
Rechargeable antimicrobial polyethylene, 2042
Antimicrobial resistance
Antimicrobial resistance and class 1 integrons in *E. coli*, 1679
Antimicrobial resistance and virulence in enterococci, 760
Antimicrobial susceptibility of *L. paracasei*, 339
Antimycotic
Antimycotics and diacetate in RTE meats, 1386
Antiyeast
Low-molecular-weight antiyeast metabolites of a protective culture, 2481
Apple juice
Membrane damage and inactivation of bacteria in apple juice by RFEF, 684
Apples
Mycotoxins produced in apples, 1714
Sanitizers for inactivation of *P. expansum* on apples, 643
Arcobacter
Isolation of *Arcobacter* from beef, 850
Prevalence and diversity of *Arcobacter* in the Chech Republic, 719
Arcobacter spp.
Arcobacter spp. in poultry processing, 2533
Susceptibility of *Arcobacter* spp. to aromatic compounds, 165
Aromatic compounds
Susceptibility of *Arcobacter* spp. to aromatic compounds, 165
Artificial neural networks
Predictive microbiology, 6
Aseptic
Sterility testing of an aseptic dispensing valve, 653
Aseptic filling
New sterilization process for aseptic packaging, 2119
Aspergillus niger
Sterility testing of an aseptic dispensing valve, 653
Assay
Detection of *Salmonella* Enteritidis by polymixin-ELISA, 392
Atomic force microscope
Stainless steel surface roughness and finish, 170
ATP
Membrane damage and inactivation of bacteria in apple juice by RFEF, 684
Thermal inactivation of bacteria in liquid egg, 1988
Attachment
Physicochemical properties of *Salmonella*, 2421
Resistance of *E. sakazakii* to desiccation, 940
Audit
Potentially prohibited tissue removal, 573
Autoinducer
Identification of AI-2 inhibitors from ground beef, 134
Role of quorum sensing in food spoilage, 1510
Autoinducing peptide
Role of quorum sensing in food spoilage, 1510
Autolysis
Ochratoxin A adsorption by yeast, 1496
Automated microbiology
Automated MPN determination of *Enterobacteriaceae* in food, 376
Automated rep-PCR
Evaluation of an automated rep-PCR system, 1372
Avian influenza
Thermal inactivation of viruses in chicken meat, 1214

Bacillus anthracis
Efficacy of household products against *Bacillus* spores, 473
Bacillus cereus
B. cereus: enterotoxigenic and genetic profile, 2115
C. perfringens and *B. cereus* in seafood, 1178
Efficacy of household products against *Bacillus* spores, 473
Physiological response of *B. cereus* to food processing treatments, 2168
Survival of *B. cereus* during green olive fermentation, 1393
Bacillus spores
Bacillus spore inactivation differences, using two pressurizing fluids, 1186
Bacteria
Antibacterial effects of polyphosphates, 1401
Antibiotic-resistant bacteria in herbal products, 1486
Bacterial communities
16S rDNA profiling of alfalfa sprouts–associated bacteria, 200
Bacterial transfer
Listeria transfer from knives to turkey breast, 176
Bacterial translocation
Lactobacillus systemic immune functions and bacterial translocation, 796
Bactericidal
Bactericidal effect of lactoferrin and its derivatives, 2468
Bacteriocin
Bacteriocin-producing starters in fermented sausages, 1817
Biop.otective potential of LAB in malting and brewing, 1724
L. monocytogenes inactivation by AS-48, 2460
Bacteriological quality
Incidence of *Salmonella* in imported seafood, 1460
Bacteriology
Time course of infection with *Salmonella* Typhimurium in fattening pigs, 699
Bacteriophage
Detection of *Salmonella* using a simple phage assay, 380
Fecal versus RAMS detection of *E. coli* O157:H7, 691
Toxin expression in O157 lineages, 1673
Barley
Occurrence of bound deoxynivalenol in Fusarium-infected barley, 1266
Barotolerance
Heat shock induces barotolerance in *L. monocytogenes*, 426
BAX system
BAX system PCR method for *Salmonella* versus Brazil's official method, 2442

Beef
Combined treatments with irradiation on beef microbiology, 1237
Danofloxacin in beef muscle, 1720
Detection of *Sarcocystis* parasites in retail beef, 2144
E. coli O157:H7 and *Salmonella* in lairages, 1752
Effect of incubation temperature on APCs, 373
Effects of interventions on MDR *Salmonella*, 2177
Heat resistance of *Salmonella* serotypes, 509
Radiosensitivity of pathogens in ground beef, 516
Salmonella prevalence in bovine lymph nodes, 1685
Xylitol to reduce microbial adhesion, 405
Beef casings
Lymphoid tissue reduction in bovine small intestines, 1199
Beef cattle
Shedding of foodborne pathogens by Florida cattle, 807
Virulence genes in *E. coli* O157 and non-O157 isolates, 1774
Beef head
Antimicrobial interventions of bovine heads, 621
Beef jerky
Controlling pathogens in beef jerky, 918
Beer
Bioprotective potential of LAB in malting and brewing, 1724
Behavioral theory
Cancer patients and food safety, 1666
Benzoic acid
Microbiology of sweet potato puree, 639
Beverage
Ricin and abrin in beverages, 1875
Bile
Isolation of *C. jejuni* from bovine bile, 1228
Bioassay
Detection of PAHs in smoked meat, 993
Role of quorum sensing in food spoilage, 1510
Biocide
Inactivation of *B. anthracis* in milk, 333
Biodefense
Thermal and hydrostatic inactivation, 196
Biofilm(s)
Fourteen-day-old chicken cecal microflora, 1981
Listeria transfer from knives to turkey breast, 176
L. monocytogenes biofilms and bacteriocins, 634
Resistance of *E. sakazakii* to desiccation, 940
Stainless steel surface roughness and finish, 170
Temperature and nutrient effects on *C. jejuni*, 271
Biogenic amines
Decarboxylating strains in a typical Italian cheese, 205
Enterococci in spontaneous sausage fermentation, 1244
M. morganii ornithine decarboxylase, 657
Safety and quality assessment of lagoon grey mullets, 2572
Bioinformatics
Detection and genotyping noroviruses using DNA microarrays, 1434
Biological applications of polymers
Rechargeable antimicrobial polyethylene, 2042
Bioluminescence
Detection of *Salmonella* using a simple phage assay, 380
Biopreservation
Low-molecular-weight antiyeast metabolites of a protective culture, 2481
Bioprotection
Bioprotective potential of LAB in malting and brewing, 1724
Bivalve
Effect of HPP on freely suspended and bivalve-associated T7, 345
Black pepper
Decontamination of *E. coli* with ozone, 914
Blade
Blade tenderization of beef containing *E. coli*, 2190
Blanching
L. monocytogenes in produce processing, 735
Blood
Competitive ELISA to detect bovine blood, 1000
Blueberries
Heat-resistant fungi from blueberries, 2030
Bluefin tuna
Mercury in bluefin tuna, 595
Body weight gain
Effects of a probiotic culture on performance of weaned piglets, 1797
Bologna
Survival of *L. monocytogenes* in a gastrointestinal model, 2014
Boneless meat
Microbiological quality of chicken meat, 1123
Bottle
New sterilization process for aseptic packaging, 2119
Bound mycotoxins
Occurrence of bound deoxynivalenol in Fusarium-infected barley, 1266
Bovine
Competitive ELISA to detect bovine blood, 1000
Non-O157 STEC from humans, cattle, and food in the United States, 1023
Bovine DNA quantification
Real-time PCR quantitative detection of bovine DNA in feedstuffs, 564
Bovine spongiform encephalopathy (BSE)
A comparison of BSE risk between Japanese and U.S. beef, 802
Cross-contamination of CNS tissue due to beef carcass splitting, 83
Detection of central nervous system tissues in meat products, 2059
Developing group-specific primers, 2257
Lymphoid tissue reduction in bovine small intestines, 1199
Potentially prohibited tissue removal, 573
Brazil nuts
Microbiology of raw nuts, 402
Breaded
Salmonellosis from stuffed chicken products, 2153
Broiler(s)
Campylobacter on retail broiler carcasses in New Zealand, 2526
L. monocytogenes in poultry flocks, 1996
Broiler flocks
Campylobacter in thinning of broiler flocks, 264
Buffered sodium citrate
Control of *C. perfringens* in Tajik sambusa, 77

Caco-2 cell
In vitro digestion and bioavailability of LDPs, 979
Cadmium
Linking soil quality to human cadmium exposure, 2504
Calcium chloride
Effects of chloride salts on microbial growth, 1412
Campylobacter
Antibiotic resistance of *Campylobacter* isolates from Poland, 602
Campylobacter in paired turkey and swine farms, 1791
Campylobacter in thinning of broiler flocks, 264
Campylobacter on retail broiler carcasses in New Zealand, 2526
Campylobacter prevalence in poultry production, 2295
Campylobacter spp. in raw and ready-to-eat foods, 2087
Detection methods for *Campylobacter* spp., 835
Detection of *Campylobacter* spp., 2543
Economics of *Campylobacter* control in poultry, 479
Peracetic acid mixture as an antimicrobial treatment in poultry, 1119
Shedding of foodborne pathogens by Florida cattle, 807
Campylobacter coli
Campylobacter in paired turkey and swine farms, 1791
Campylobacter jejuni
Campylobacter in paired turkey and swine farms, 1791
C. jejuni cross-contamination, 1018
Contamination of kitchen by *C. jejuni* in raw vegetables, 2448
Inactivation of antibiotic-resistant *Campylobacter*, 1145
Isolation of *C. jejuni* from bovine bile, 1228
Temperature and nutrient effects on *C. jejuni*, 271
Cancer patients
Cancer patients and food safety, 1666
Candida
Yeasts from refrigerated commercial shell eggs, 1258

Cantaloupe(s)
Identification of *Salmonella* serotypes by PCR-RFLP, 2217
Microflora on cantaloupes, 46
Carbon dioxide
Antimicrobial activity of *D. salina* extracts, 2138
Y. enterocolitica in ground pork packaged under modified atmospheres, 845
Carbon monoxide
Spoilage and safety characteristics of ground beef, 293
Carcass(es)
E. coli inhibition by colicin E1, 2519
E. coli O157:H7 and *Salmonella* in lairages, 1752
Effect of incubation temperature on APCs, 373
Xylitol to reduce microbial adhesion, 405
Carcass mapping
Mapping of *Salmonella* contamination on the poultry carcass, 1785
Carcass maturity score
A comparison of BSE risk between Japanese and U.S. beef, 802
Carcass prevalence
E. coli O157 in feces and on beef carcasses, 1761
Carvacrol
Facilitated thermal inactivation of *E. coli* O157:H7, 1604
Inactivation of antibiotic-resistant *Campylobacter*, 1145
T. vulgaris and a stored food mite, 351
Cashews
Microbiology of raw nuts, 402
Catalonia, Spain
Dietary intake of hexachlorobenzene, 2148
Catering
Foodborne disease outbreaks in the catering industry, 550
Catfish
Radiation D_{10}-values of *L. monocytogenes* on catfish and tilapia, 2278
Cattle
Dust exposure and pathogen increases on cattle hides, 2078
E. coli O157:H7 and *Salmonella* in lairages, 1752
Effect of transportation and lairage on risk of *S. enterica* in cattle, 2228
Fecal versus RAMS detection of *E. coli* O157:H7, 691
Impact of transportation and lairage on *E. coli* O157:H7 in cattle, 1114
Isolation of *C. jejuni* from bovine bile, 1228
Lymphoid tissue reduction in bovine small intestines, 1199
Salmonella prevalence in bovine lymph nodes, 1685
Cattle feces
Detection of Shiga toxin–producing *E. coli*, 927
Cecal microflora
Fourteen-day-old chicken cecal microflora, 1981
Celiac disease
Approaches to establish thresholds, 1043
Lactobacillus for gluten and phytate hydrolosis in gluten-free bread, 1491
Cell-free translation assay
Detection of risin in foods, 2053
Cell hydrophobicity
Altered cell composition in stress-adapted *L. innocua*, 182
Cell signaling
Identification of AI-2 inhibitors from ground beef, 134
Cellulose-containing biofilm
Cellulose production in *E. sakazakii* biofilms, 13
Central nervous system
Cross-contamination of CNS tissue due to beef carcass splitting, 83
Detection of central nervous system tissues in meat products, 2059
Central nervous system tissue
Comparison of detection methods for CNST, 1505
Cetrimide
Altered cell composition in stress-adapted *L. innocua*, 182
Chain modeling
Linking soil quality to human cadmium exposure, 2504
Cheese
Antibacterial activity of dextran-conjugated lysozyme in cheese curd, 411
Listeria spp. in farmstead cheese processing environments, 2239
Pathogen incidence in raw milk, 1580
Survival of *L. monocytogenes* on surface-mold-ripened soft cheese, 1563
Chemical-activated luciferase expression assay (CALUX)
Detection of PAHs in smoked meat, 993
Chemical composition
Influence of extraction methods on *N. sativa* essential oils, 2475
Chemical dehairing
Reduction of hide microbial contamination, 2223
Chemical oxygen demand
Impact of water reuse in fresh-cut washing, 2514
Chicken(s)
Antibiotic resistance of *Campylobacter* isolates from Poland, 602
Bacteriology of raw chicken nuggets, 613
C. jejuni cross-contamination, 1018
Distribution of drug residues in breast muscle tissues, 223
Evaluation of a copper sulfate–based commercial disinfectant, 226
Fourteen-day-old chicken cecal microflora, 1981
Risk assessment of *Listeria* in ready-to-eat chicken production line, 946
Salmonellosis from stuffed chicken products, 2153
Virulence genes in *E. coli* O157 and non-O157 isolates, 1774
Chicken frankfurters
Model for growth of *Salmonella* on chicken frankfurters, 1135
Chicken meat
Economics of *Campylobacter* control in poultry, 479
Chile pepper
Identification of *Salmonella* serotypes by PCR-RFLP, 2217
Chilling
Allergen release by frozen and chilled *Anisakis*, 2578
Application of meta-analysis in food safety, 1330
China
STEC and *E. coli* O157 from retail meats in China, 706
Chitosan film
Antimicrobial activity of lactoferrin, 319
Chlorinated wash water
Microflora on cantaloupes, 46
Chlorine dioxide
Parasite inactivation by chlorine dioxide, 2410
Cinnamaldehyde
Facilitated thermal inactivation of *E. coli* O157:H7, 1604
Inactivation of antibiotic-resistant *Campylobacter*, 1145
Susceptibility of *Arcobacter* spp. to aromatic compounds, 165
Cinnamon
Combined treatments with irradiation on beef microbiology, 1237
Citrinin
Mycotoxins produced in apples, 1714
Class 1 integrons
Antimicrobial resistance and class 1 integrons in *E. coli*, 1679
Cleaning
Cleaning and validation to prevent allergen cross-contact, 445
Risk assessment of *Listeria* in ready-to-eat chicken production line, 946
Cleaning protocols
Allergen cross-contamination in the manufacture of fine bakery wares, 2263
Clenbuterol residue
Screening clenbuterol by strip and ELISA, 865
Clostridium botulinum
Proteolytic *C. botulinum* in rice at low pH, 468
Clostridium perfringens
Control of *C. perfringens* in Tajik sambusa, 77
C. perfringens and *B. cereus* in seafood, 1178
Clostridium sporogenes
Heat tolerance of *C. sporogenes* spores, 953
Coagulase type
Characteristics of enterotoxin H–producing *S. aureus*, 1855
Cocoa
OTA removal procedure for cocoa shells, 1422
Cold
Altered cell composition in stress-adapted *L. innocua*, 182
L. monocytogenes growth at low temperature, 420
Cold atmospheric gas plasma

Decontamination of mango and melon by gas plasma, 302
Plasma inactivation of bacteria migrating through fruits, 1619
Cold shock
In vitro cold shock gene expression in *Vibrio vulnificus*, 157
Colicin E1
E. coli inhibition by colicin E1, 2519
Coliform bacilli
Isolation of *C. jejuni* from bovine bile, 1228
Coliform counts
Effects of a probiotic culture on performance of weaned piglets, 1797
Coliform flora
Tracing the origin of coliform bacteria, 1910
Coliforms
Coliforms and foodborne pathogens on spinach in packing plants, 2398
Poultry skin flora after successive washings, 1707
Colloidal gold
Enhanced rapidity for *L. monocytogenes* detection, 781
Colorimetric method
Alkaline phosphates in cow's, goat's, and sheep's milk, 1884
Commensal *E. coli*
Antimicrobial resistance and class 1 integrons in *E. coli*, 1679
Commercialization conditions
Microbial quality in mineral waters, 1253
Comminuted fermented meats
Toxoplasma in ready-to-eat smallgoods, 1442
Comparison
Isolation of *Arcobacter* from beef, 850
Competitive enzyme-linked immunosorbent assay
Competitive ELISA to detect bovine blood, 1000
OTA determination in grapes, 2488
Compositions
HPP inactivation of FCV, 1598
Compost
Determining *E. coli* O157:H7 levels in manures and soil, 2233
Consumer education
Cooking parameters for safe seafood for consumers, 1287
Consumer food safety
Consumer food safety knowledge and behaviors, 1651
Consumers
Consumer assessment of safety/date labeling on RTE meat products, 70
Listeria and *Enterobacteriaceae* in domestic refrigerators, 608
Contamination
Bacteriological safety in São Jorge cheese manufacture, 986
Contamination of carcasses with *Salmonella* during poultry slaughter, 146
Factors for produce contamination, 2389
Incidence of *Salmonella* in imported seafood, 1460
Salmonella contamination of food service eggs, 19
Sources of contamination and pathogen excretion from infected persons, 2582
Sulfamethazine water medication pharmacokinetics and contamination, 584
Continuous-flow culture
Fourteen-day-old chicken cecal microflora, 1981
Conventional culture
Detection methods for *Campylobacter* spp., 835
Cookies
Allergen cross-contamination in the manufacture of fine bakery wares, 2263
Cooking
Heat resistance of *Salmonella* serotypes, 509
Toxoplasma in ready-to-eat smallgoods, 1442
Cooking protocols
Cooking parameters for safe seafood for consumers, 1287
Copper sulfate
Evaluation of a copper sulfate–based commercial disinfectant, 226
Cornish game hen
Mapping of *Salmonella* contamination on the poultry carcass, 1785
Corylus avellana
Allergen cross-contamination in the manufacture of fine bakery wares, 2263
Cost
Application of MCDA to a food safety decision-making problem, 2323
Cost-benefit analysis
Economics of *Campylobacter* control in poultry, 479
Cow's milk
Immunoreactivity of irradiated milk and whey samples, 1270
Cross-contact
Cleaning and validation to prevent allergen cross-contact, 445
Cross-contamination
Allergen cross-contamination in the manufacture of fine bakery wares, 2263
C. jejuni cross-contamination, 1018
Contamination of kitchen by *C. jejuni* in raw vegetables, 2448
Cross-protection
Contribution of sigma B factor in alkali tolerance in *L. monocytogenes*, 1481
Cross-reactivity
Latex glove use by food handlers, 2334
Cryptosporidium
Analysis of shellfish for *Cryptosporidium* and *Giardia*, 959
Parasite inactivation by chlorine dioxide, 2410
Cull sow
L. monocytogenes in cull sows and pork, 545
Curcuma xanthorrhiza Roxb.
Antibacterial activity of xanthorrhizol, 1926
Cyanide poisoning
Enzyme immunoassay for detection for amygdalin, 2048
Cyclopiazonic acid
Efficient fungal DNA extraction method for RAPD-PCR, 2497
Cyclospora
Parasite inactivation by chlorine dioxide, 2410
Cytokine
Lactobacillus systemic immune functions and bacterial translocation, 796

Dairy
Inactivation of *B. anthracis* in milk, 333
Predicting *Salmonella* prevalence in a dairy herd, 1967
Dairy cattle
Multidrug-resistant *Salmonella*, 27
Dairy farming
Food safety for the Turkish dairy industry, 440
Dairy industry
Food safety for the Turkish dairy industry, 440
Dairy products
Survival of *L. innocua* in dairy products, 742
Survival of *L. monocytogenes*, 1835
Danofloxacin
Danofloxacin in beef muscle, 1720
Date labels
Consumer assessment of safety/date labeling on RTE meat products, 70
Dates
Microbial spoilage of rutab, 1406
Death kinetics
Bacterial reduction in UV irradiated chill brines, 629
Decarboxylating strains
Decarboxylating strains in a typical Italian cheese, 205
Decimal reduction time
Storage stability of freeze-dried lactic acid bacteria, 431
Decontamination
Contamination of kitchen by *C. jejuni* in raw vegetables, 2448
Decontamination of almonds with infrared heat, 897
Effect of different water temperatures on knife decontamination, 1338
OTA removal procedure for cocoa shells, 1422
Survival of murine norovirus 1 on onions and spinach, 1590
UV light–hydrogen peroxide decontamination of lettuce, 903
Water disinfection from the fresh-cut vegetable industry, 286
Dense phase carbon dioxide

Dense phase CO_2 processing of spinach, 1015
Deoxynivalenol
Deoxynivalenol contamination in wheat products, 1931
LC-UV-MS method for DON, DON-3-glucoside, and pigment, 1205
Occurrence of bound deoxynivalenol in Fusarium-infected barley, 1266
Deoxynivalenol-3-glucoside
LC-UV-MS method for DON, DON-3-glucoside, and pigment, 1205
Descriptive analysis
Risk factors for food premises unsatisfactory inspection results, 1632
Desiccation
Inactivation of desiccated *E. sakazakii*, 934
Resistance of *E. sakazakii* to desiccation, 940
Detection
Detection and genotyping noroviruses using DNA microarrays, 1434
Detection of abrin, 1868
Detection of *Salmonella* using a simple phage assay, 380
Listeria spp. in farmstead cheese processing environments, 2239
Detection method(s)
Detection of Shiga toxin–producing *E. coli*, 927
Salmonella detection methods on turkey parts, 386
Detection of *Salmonella*
BAX system PCR method for *Salmonella* versus Brazil's official method, 2442
Devriesia spp.
Heat-resistant fungi from blueberries, 2030
Dextran
Antibacterial activity of dextran-conjugated lysozyme in cheese curd, 411
Dietary exposure
Dietary intake of hexachlorobenzene, 2148
Differentiation
Arcobacter spp. in poultry processing, 2533
Salmonella identification and strain differentiation by HGMF-IR, 2249
Direct-fed microbial
Probiotics effect on *E. coli* O157:H7 and *Salmonella* shedding in cattle, 539
Discrimination
Distinguishable control strains for food microbiology testing, 2301
SSCP analysis for rapid discrimination of *Salmonella* isolates, 1960
Disease control
Fludioxonil residues and control of blue and gray mold on pears, 967
Disease management
Potassium sorbate for controlling postharvest brown rot, 1626
Disinfectant(s)
Efficacy of household products against *Bacillus* spores, 473
Electrolyzed water in the food industry, 1934
Dispensing valve
Sterility testing of an aseptic dispensing valve, 653
Distribution
Oxytetracycline residue depletion in giant freshwater prawn, 870
DNA barcoding
DNA barcoding and the *Regulatory Fish Encyclopedia*, 210
DNA extraction
DNA extraction for PCR detection of food pathogens, 2110
Efficient fungal DNA extraction method for RAPD-PCR, 2497
Domestic kitchen
Contamination of kitchen by *C. jejuni* in raw vegetables, 2448
Domestic refrigerator
Domestic refrigeration practices, 1898
Domiati cheese
S. aureus and Domiati cheese, 2567
Dorsal root ganglia
Detection of DRG in advanced meat recovery product, 2307
Double separatory funnel
Validated digestion assay to detect *Trichinella* larvae in horse meat, 558
Drain
L. monocytogenes in drain pipes, 66
Drop plating
Mapping of *Salmonella* contamination on the poultry carcass, 1785
Drug resistant
Heat resistance of *Salmonella* serotypes, 509
Dry-cured ham
E-beam radiation of dry-cured ham, 2001
Dry cured salami
E. coli O157:H7 inhibition in dry sausage by mustard powder, 486
Dry fermented sausage
L. monocytogenes on salami during storage, 494
Predictive microbiology, 6
Dry sausage
Survival of *L. monocytogenes* in dry sausage, 1550
D_{10}-value
Inactivation of desiccated *E. sakazakii*, 934
Dunaliella salina
Antimicrobial activity of *D. salina* extracts, 2138
Dust
Dust exposure and pathogen increases on cattle hides, 2078
D-value
Heat-resistant fungi from blueberries, 2030
Modification of the submerged coil, 775
Dynamic modeling
Modeling *L. monocytogenes* in pasteurized vanilla cream, 1828

eaeA
Prevalence of *E. coli* O157:H7 in vegetables, 816
E-beam radiation
E-beam radiation of dry-cured ham, 2001
Effectiveness
Application of MCDA to a food safety decision-making problem, 2323
Egg(s)
Detection of *Salmonella* Enteritidis by polymixin-ELISA, 392
Salmonella contamination of food service eggs, 19
Salmonella Enteritidis growth on egg yolk membranes, 1905
Salmonella Enteritidis in eggs, 2073
Egg safety
Salmonella Enteritidis in eggs, 2073
18S rRNA
Real-time PCR quantitative detection of bovine DNA in feedstuffs, 564
Electrochemiluminescence
Detection of abrin, 1868
Electrolyzed oxidizing water
Economics of *Campylobacter* control in poultry, 479
Electrolyzed water
Electrolyzed water in the food industry, 1934
Electron beam radiation
E-beam radiation for reducing pathogens in spinach, 2415
Electrostatic
Virus adsorption to lettuce, 522
Emetic toxin
C. perfringens and *B. cereus* in seafood, 1178
Enrichment
E. coli O157:H7 enrichment in produce, 139
Enrofloxacin
Distribution of drug residues in breast muscle tissues, 223
Enteric virus(es)
UV light–hydrogen peroxide decontamination of lettuce, 903
Viral contamination in clams, 1689
Virus adsorption to lettuce, 522
Enterobacteriaceae
Automated MPN determination of *Enterobacteriaceae* in food, 376
Bacteriological safety in São Jorge cheese manufacture, 986
Hygiene indicator criteria for meat in Belgium, 35
Listeria and *Enterobacteriaceae* in domestic refrigerators, 608
Enterobacter sakazakii
Cellulose production in *E. sakazakii* biofilms, 13
Evaluation of an automated rep-PCR system, 1372
Inactivation of desiccated *E. sakazakii*, 934
Resistance of *E. sakazakii* to desiccation, 940
Enterococci
Enterococcal contamination of food by houseflies, 435
Enterococci in spontaneous sausage fermentation, 1244

L. monocytogenes biofilms and bacteriocins, 634
Enterococcus
Enterococci from human patients and foods, 2100
Enterococcus faecalis
Antimicrobial resistance and virulence in enterococci, 760
Enterohemorrhagic *Escherichia coli* (EHEC)
Occurrence of STEC in meat products in Morocco, 2082
Transcription of stx_1, *marA*, and *eaeA* in *E. coli* O157:H7, 1469
Enterotoxin
C. perfringens and *B. cereus* in seafood, 1178
Detection of *S. aureus*, 191
Enterotoxin genes
Multiplex PCR detection of enterotoxin genes in *Aeromonas* spp., 2094
S. aureus and Domiati cheese, 2567
Enterotoxin production
B. cereus: enterotoxigenic and genetic profile, 2115
Enumeration
Automated MPN determination of *Enterobacteriaceae* in food, 376
Determining *E. coli* O157:H7 levels in manures and soil, 2233
Enumeration method
Mapping of *Salmonella* contamination on the poultry carcass, 1785
Environmental sampling
Listeria spp. in farmstead cheese processing environments, 2239
Enzyme immunoassay
Enzyme immunoassay for detection for amygdalin, 2048
Enzyme-linked immunosorbent assay (ELISA)
Allergen cross-contamination in the manufacture of fine bakery wares, 2263
Characteristics of enterotoxin H–producing *S. aureus*, 1855
Comparison of detection methods for CNST, 1505
Cross-contamination of CNS tissue due to beef carcass splitting, 83
Detection of abrin, 1868
Detection of central nervous system tissues in meat products, 2059
Detection of melamine, 590
Enhanced rapidity for *L. monocytogenes* detection, 781
Screening clenbuterol by strip and ELISA, 865
Epidemic clones
Epidemiologic relevance of MVLST, 2559
Epidemiologic concordance
Epidemiologic relevance of MVLST, 2559
Epidemiology
Factors for produce contamination, 2389
Escherichia coli
Antimicrobial resistance in poultry bacteria, 2537
Bacteriology of raw chicken nuggets, 613
Coliforms and foodborne pathogens on spinach in packing plants, 2398
Decontamination of *E. coli* with ozone, 914
Dense phase CO_2 processing of spinach, 1015
Detection of Shiga toxin–producing *E. coli*, 927
E. coli inhibition by colicin E1, 2519
Hygiene indicator criteria for meat in Belgium, 35
Inhibition of pathogen adhesion, 2272
Membrane damage and inactivation of bacteria in apple juice by RFEF, 684
Microbiological profile of hydroponic tomatoes, 60
Microbiology of raw nuts, 402
On-farm meat safety, 1919
Radiosensitivity of pathogens in ground beef, 516
Risk assessment for STEC in unpasteurized milk, 257
Risk factors for *Salmonella* and hygiene indicators in pig slaughterhouses, 1320
Salmonella on hydroponic tomatoes, 676
Surrogates for *Salmonella* in meat, 714
Thermal inactivation of bacteria in liquid egg, 1988
Toxin expression in O157 lineages, 1673
Water disinfection from the fresh-cut vegetable industry, 286
Escherichia coli O157
Dust exposure and pathogen increases on cattle hides, 2078
E. coli O157 in feces and on beef carcasses, 1761
Impact of transportation and lairage on *E. coli* O157:H7 in cattle, 1114
Killing *E. coli* O157 with high pressure processing, 2182
Survival of *E. coli* O157 on lettuce, 2384
Virulence genes in *E. coli* O157 and non-O157 isolates, 1774
Escherichia coli O157:H7
Antimicrobial effect of muscadine seed extracts, 1465
Antimicrobial interventions for leafy greens, 625
Antimicrobial interventions of bovine heads, 621
Antimicrobial synergy between high pressure and Red No. 3, 1861
Blade tenderization of beef containing *E. coli*, 2190
Cold plasma sanitizing of apples, 1357
Controlling pathogens in beef jerky, 918
Determining *E. coli* O157:H7 levels in manures and soil, 2233
Distinguishable control strains for food microbiology testing, 2301
E-beam radiation for reducing pathogens in spinach, 2415
E. coli O157:H7 and *Salmonella* in lairages, 1752
E. coli O157:H7 enrichment in produce, 139
E. coli O157:H7 inhibition in dry sausage by mustard powder, 486
Effects of interventions on MDR *Salmonella*, 2177
Effects of reduced enrichment volumes, 1768
Essential oils in coatings for fresh-cut apples, 1150
Facilitated thermal inactivation of *E. coli* O157:H7, 1604
Fecal pats inoculated with *E. coli* O157:H7 to mimic a super shedder, 648
Fecal versus RAMS detection of *E. coli* O157:H7, 691
Heat inactivation of *E. coli* O157:H7 in nonintact beef, 1349
Hot water treatment decontamination of mung bean seeds, 830
HPP in combination with antimicrobials, 820
Multiple-cycle high-pressure treatments, 811
Pathogen incidence in raw milk, 1580
Predictive microbiology, 6
Prevalence of *E. coli* O157:H7 in vegetables, 816
Probiotics effect on *E. coli* O157:H7 and *Salmonella* shedding in cattle, 539
Q. infectoria as anti–*E. coli* agent, 1223
Reduction of hide microbial contamination, 2223
Reduction of microbial contamination on cattle hides, 1343
Shedding of foodborne pathogens by Florida cattle, 807
Spoilage and safety characteristics of ground beef, 293
Survival of *E. coli* O157:H7 in acid, 2404
Transfer of *E. coli* O157:H7 to lettuce from ice, 252
Essential oil(s)
Antimicrobial efficacy and sensory acceptability of plant essential oils, 1846
Antimicrobial essential oils against *L. monocytogenes* in pork, 502
Combined treatments with irradiation on beef microbiology, 1237
Essential oils in coatings for fresh-cut apples, 1150
Influence of extraction methods on *N. sativa* essential oils, 2475
Radiosensitivity of pathogens in ground beef, 516
Shelf life of coated and semifried tuna, 770
Ethanol shock
Protein expression in stressed *V. parahaemolyticus*, 2589
Expansolides A and B
Mycotoxins produced in apples, 1714
Experimental infection
Time course of infection with *Salmonella* Typhimurium in fattening pigs, 699
Exposure
Microbiological quality of chicken meat, 1123
Exposure assessment
Linking soil quality to human cadmium exposure, 2504
Extraction
OTA determination in grapes, 2488
Extrinsic and intrinsic factors
Y. enterocolitica in ground pork packaged under modified atmospheres, 845
Extrusion
Reduced toxicity of fumonisin B_1, 2036

Farmstead
Pathogen incidence in raw milk, 1580

Fatty acid composition
Acidified sodium chlorite treatment of trout fillets, 973
Altered cell composition in stress-adapted *L. innocua*, 182
Fatty acids
Identification of AI-2 inhibitors from ground beef, 134
Safety and quality assessment of lagoon grey mullets, 2572
FD&C Red No. 3
Antimicrobial synergy between high pressure and Red No. 3, 1861
Fecal-oral route
Sources of contamination and pathogen excretion from infected persons, 2582
Fecal pats
Fecal pats inoculated with *E. coli* O157:H7 to mimic a super shedder, 648
Fecal prevalence
E. coli O157 in feces and on beef carcasses, 1761
Fecal shedding
Probiotics effect on *E. coli* O157:H7 and *Salmonella* shedding in cattle, 539
Feed conversion efficiency
Effects of a probiotic culture on performance of weaned piglets, 1797
Feedlot cattle
Probiotics effect on *E. coli* O157:H7 and *Salmonella* shedding in cattle, 539
Feedstuffs
Microscopic method for animal constituents detection in feedstuffs, 578
Real-time PCR quantitative detection of bovine DNA in feedstuffs, 564
Feline calicivirus
HPP inactivation of FCV, 1598
Fermentation
Effects of chloride salts on microbial growth, 1412
Fermented meat safety
E. coli O157:H7 inhibition in dry sausage by mustard powder, 486
Fermented vegetable product
Growth inhibitory effects of kimchi against foodborne pathogens, 325
Feta cheese
Survival of *L. innocua* in dairy products, 742
Figs
LC–TOF-MS analysis of mycotoxins in figs, 1500
Fimbriae
PCR detection of *Salmonella* by *stdA* primers, 1108
Finfish
Radiation D_{10}-values of *L. monocytogenes* on catfish and tilapia, 2278
Fish
Extending shelf life of fish, 218
Microbial quality of fish fillets, 1544
Fish culture
Mercury in bluefin tuna, 595
Fish muscle
Anisakis antigens in fish muscle, 1273
fliC$_{H7}$
Prevalence of *E. coli* O157:H7 in vegetables, 816
Flocks
Campylobacter prevalence in poultry production, 2295
Flow cytometry
Physiological response of *B. cereus* to food processing treatments, 2168
Fluctuating temperature
Modeling *L. monocytogenes* in pasteurized vanilla cream, 1828
Fludioxonil
Fludioxonil residues and control of blue and gray mold on pears, 967
Fluorescence
Danofloxacin in beef muscle, 1720
Fluorophos method
Alkaline phosphates in cow's, goat's, and sheep's milk, 1884
Fluoroquinolone
Distribution of drug residues in breast muscle tissues, 223
Focus groups
Cancer patients and food safety, 1666
Food
Detection of abrin, 1868
Detection of *Salmonella* by PCR in foods, 2436
Dietary intake of hexachlorobenzene, 2148
Food adulteration
Efficacy of drug test kits for adulterated food, 1007
Food allergy
Allergen cross-contamination in the manufacture of fine bakery wares, 2263
Approaches to establish thresholds, 1043
Foodborne
Non-O157 STEC from humans, cattle, and food in the United States, 1023
Foodborne disease outbreaks
Foodborne disease outbreaks in the catering industry, 550
Operational practices associated with foodborne disease outbreaks, 1659
Foodborne outbreaks
Infective doses and pathogen carriage, 2339
Sources of contamination and pathogen excretion from infected persons, 2582
U.S. juice-associated outbreaks, 356
Foodborne pathogen(s)
Antibacterial activity of xanthorrhizol, 1926
DNA extraction for PCR detection of food pathogens, 2110
Growth inhibitory effects of kimchi against foodborne pathogens, 325
Listeria and *Enterobacteriaceae* in domestic refrigerators, 608
Metabolic effects of *Fusarium*, 1366
Water disinfection from the fresh-cut vegetable industry, 286
Food contact surfaces
L. monocytogenes adhesion and viability, 1379
Food defense
Efficacy of household products against *Bacillus* spores, 473
Food ecology
Role of quorum sensing in food spoilage, 1510
Food handling behaviors
Consumer food safety knowledge and behaviors, 1651
Food migration tests
Role of fat content in trapping volatile compounds, 1889
FoodNet
Food use and practices in long-term care facilities, 365
Food packaging
Role of fat content in trapping volatile compounds, 1889
Food pathogens
Antibacterial milkfat globule membrane fractions, 126
Food preparation
Operational practices associated with foodborne disease outbreaks, 1659
Food products
Electrolyzed water in the food industry, 1934
Food quality
Food safety for the Turkish dairy industry, 440
Food quality index
M. morganii ornithine decarboxylase, 657
Food safety
Application of MCDA to a food safety decision-making problem, 2323
Blade tenderization of beef containing *E. coli*, 2190
Controlling pathogens in beef jerky, 918
Detection of central nervous system tissues in meat products, 2059
Detection of melamine, 590
Detection of *Sarcocystis* parasites in retail beef, 2144
Detection of Shiga toxin–producing *E. coli*, 927
Domestic refrigeration practices, 1898
E-beam radiation for reducing pathogens in spinach, 2415
Enterococcal contamination of food by houseflies, 435
Foodborne disease outbreaks in the catering industry, 550
Food safety for the Turkish dairy industry, 440
L. monocytogenes in cull sows and pork, 545
L. monocytogenes on salami during storage, 494
Mercury in bluefin tuna, 595
Operational practices associated with foodborne disease outbreaks, 1659
Potentially prohibited tissue removal, 573
Rapid methiod used to analyze Ochratoxin A, 2133
Risk factors for food premises unsatisfactory inspection results, 1632

Salmonella contamination of food service eggs, 19
Sandwiches from health care establishments, 309
Survival of *E. coli* O157 on lettuce, 2384
U.S. FDA regulatory management of human listeriosis, 1277
Food safety education
Cancer patients and food safety, 1666
Food safety knowledge
Consumer food safety knowledge and behaviors, 1651
Food service
Campylobacter spp. in raw and ready-to-eat foods, 2087
Salmonella contamination of food service eggs, 19
Sterility testing of an aseptic dispensing valve, 653
Food spoilage
Role of quorum sensing in food spoilage, 1510
Food supplements
Regulation of safety of probiotics, 1734
Food suppliers
Operational practices associated with foodborne disease outbreaks, 1659
Food workers
Infective doses and pathogen carriage, 2339
Sources of contamination and pathogen excretion from infected persons, 2582
Forage
On-farm meat safety, 1919
Francisella tularensis
Thermal resistance of *F. tularensis*, 2208
Frankfurters
Control of *L. monocytogenes* on frankfurters, 728
Estimating *L. monocytogenes* growth kinetics parameters in frankfurters, 1806
Freezing
Allergen release by frozen and chilled *Anisakis*, 2578
Survival of murine norovirus 1 on onions and spinach, 1590
Fresh bagged salad
E-beam radiation for reducing pathogens in spinach, 2415
Fresh-cut apple
Essential oils in coatings for fresh-cut apples, 1150
Fresh produce
Cold plasma sanitizing of apples, 1357
Fresh vegetables
DNA extraction for PCR detection of food pathogens, 2110
Frozen
Salmonellosis from stuffed chicken products, 2153
Fruit juice
L. monocytogenes inactivation by AS-48, 2460
Thermal resistance of *F. tularensis*, 2208
Fruits
Factors for produce contamination, 2389
L. monocytogenes inactivation by AS-48, 2460
Fumonisins
LC–TOF-MS analysis of mycotoxins in figs, 1500
Reduced toxicity of fumonisin B_1, 2036
Fungi
Survival of *L. innocua* in dairy products, 742
Fungicide treatments
Fludioxonil residues and control of blue and gray mold on pears, 967
Furanosyl borate diester
Role of quorum sensing in food spoilage, 1510
Fusarium head blight
Occurrence of bound deoxynivalenol in Fusarium-infected barley, 1266
Fusarium species
Antifungal activity of *L. paracasei*, 2213
Metabolic effects of *Fusarium*, 1366

Gamma radiation
Immunoreactivity of irradiated milk and whey samples, 1270
Inactivation of desiccated *E. sakazakii*, 934
Gaping
Icing to control *V. vulnificus* and *V. parahaemolyticus*, 1475
Gas chromatography–mass spectrometry (GC-MS)
Antimicrobial activity of *D. salina* extracts, 2138
Gasteroenteritis
Antibiotic resistance in *V. parahaemolyticus*, 2552
Gastrointestinal model
Survival of *L. monocytogenes* in a gastrointestinal model, 2014
Gene expression
Transcription of stx_1, *marA*, and *eaeA* in *E. coli* O157:H7, 1469
Genetic profile
B. cereus: enterotoxigenic and genetic profile, 2115
Germicidal air cleaning unit
Control of airborne microorganisms in meat processing, 1922
Germination
Thermal and hydrostatic inactivation, 196
Giant freshwater prawn
Oxytetracycline residue depletion in giant freshwater prawn, 870
Giardia
Analysis of shellfish for *Cryptosporidium* and *Giardia*, 959
Glial fibrillary acidic protein
Cross-contamination of CNS tissue due to beef carcass splitting, 83
Gliding arc
Cold plasma sanitizing of apples, 1357
Gluconic acid
Survival of *E. coli* O157:H7 in acid, 2404
Gluten
Approaches to establish thresholds, 1043
Gluten-free bread
Lactobacillus for gluten and phytate hydrolosis in gluten-free bread, 1491
Glycosylation
Antibacterial activity of dextran-conjugated lysozyme in cheese curd, 411
Goat lactoferricin
Expression of goat lactoferricin from *E. coli*, 2523
Gram-negative bacteria
Antibacterial activity of mushroom extracts, 1701
Gram-positive bacteria
Antibacterial activity of mushroom extracts, 1701
Evaluation of *tdc* and its transcript in bacteria and foods, 93
Grape
OTA determination in grapes, 2488
Grape seed extract
Natural antimicrobial combinations against *L. monocytogenes*, 2105
Green fluorescent protein
Temperature and nutrient effects on *C. jejuni*, 271
Greenhouse
Microbiological profile of hydroponic tomatoes, 60
Salmonella on hydroponic tomatoes, 676
Green olive fermentation
Survival of *B. cereus* during green olive fermentation, 1393
Green tea extract
Natural antimicrobial combinations against *L. monocytogenes*, 2105
Ground beef
Detection of risin in foods, 2053
Effects of reduced enrichment volumes, 1768
Facilitated thermal inactivation of *E. coli* O157:H7, 1604
Multiple-cycle high-pressure treatments, 811
Ground muscle
Thermal inactivation of *Salmonella* in turkey breast, 2548
Ground mustard
E. coli O157:H7 inhibition in dry sausage by mustard powder, 486
Ground pork
Y. enterocolitica in ground pork packaged under modified atmospheres, 845
Group-specific primers
Developing group-specific primers, 2257
Growth
L. monocytogenes growth at low temperature, 420
Model for growth of *Salmonella* on chicken frankfurters, 1135
Growth kinetics
Growth of *Salmonella* during sprouting, 888

Growth limits
Listeria inactivation affected by sequences of stresses, 1169
Growth media
Immunomodulatory activity of lactococci, 2124
Guinea pigs
Virulence of persistent *L. monocytogenes* in pregnant guinea pigs, 1028
Gut enzymes
In vitro digestion and bioavailability of LDPs, 979

Half inhibitory concentration (IC_{50})
Detection of risin in foods, 2053
Hamigera striata
Heat-resistant fungi from blueberries, 2030
Hand washing
Hand washing frequencies and procedures, 1641
Harvest equipment
On-farm contamination of persimmons, 52
Hazard analysis critical control point (HACCP)
Aerobic plate counts as a measure of HACCP effectiveness, 1248
Food safety for the Turkish dairy industry, 440
Risk factors for food premises unsatisfactory inspection results, 1632
Hazelnut(s)
Allergen cross-contamination in the manufacture of fine bakery wares, 2263
Microbiology of raw nuts, 402
Health Belief Model
Cancer patients and food safety, 1666
Health care establishments
Sandwiches from health care establishments, 309
Heat
Altered cell composition in stress-adapted *L. innocua*, 182
Decontamination of almonds with infrared heat, 897
Heat inactivation
Antibiotics in milk, 1193
Heat resistance
Heat resistance of *Salmonella* serotypes, 509
Heat-resistant fungi from blueberries, 2030
Heat tolerance of *C. sporogenes* spores, 953
Heat shock
Heat shock induces barotolerance in *L. monocytogenes*, 426
Protein expression in stressed *V. parahaemolyticus*, 2589
Heat treatment
Growth inhibitory effects of kimchi against foodborne pathogens, 325
Heavy metal
Linking soil quality to human cadmium exposure, 2504
Safety and quality assessment of lagoon grey mullets, 2572
Hemolysis
In vitro digestion and bioavailability of LDPs, 979
Herbal
Antibiotic-resistant bacteria in herbal products, 1486
Heterogeneity
L. monocytogenes HHP inactivation, 2007
Physiological response of *B. cereus* to food processing treatments, 2168
Hexachlorobenzene
Dietary intake of hexachlorobenzene, 2148
Hidden allergens
Allergen cross-contamination in the manufacture of fine bakery wares, 2263
Hide(s)
E. coli O157:H7 and *Salmonella* in lairages, 1752
On-farm meat safety, 1919
Hide decontamination
Reduction of hide microbial contamination, 2223
Reduction of microbial contamination on cattle hides, 1343
High hydrostatic pressure
L. monocytogenes HHP inactivation, 2007
Reduction of *Salmonella* Enteritidis on almonds by high-pressure water, 825
High-performance liquid chromatography (HPLC)
Deoxynivalenol contamination in wheat products, 1931
Rapid methiod used to analyze Ochratoxin A, 2133
High pressure
HPP inactivation of FCV, 1598
Hydrolysates of β-lactoglobulin with low IgE binding, 1453
Killing *E. coli* O157 with high pressure processing, 2182
Multiple-cycle high-pressure treatments, 811
High pressure processing (HPP)
Bacillus spore inactivation differences, using two pressurizing fluids, 1186
Effect of HPP on freely suspended and bivalve-associated T7, 345
Heat shock induces barotolerance in *L. monocytogenes*, 426
High-pressure processing of human milk, 109
High-pressure processing of Turkish white cheese, 102
High-pressure treatment of *L. monocytogenes* in smoked salmon, 1612
HPP in combination with antimicrobials, 820
High shedders
E. coli O157 in feces and on beef carcasses, 1761
High throughput
Detection of *Salmonella* Enteritidis by polymixin-ELISA, 392
Histo-blood group antigen expression
Seasonal binding of recombinant norovirus to GI cells in oysters, 1696
Histology
Detection of *Sarcocystis* parasites in retail beef, 2144
Honey dew melon
SA11 rotavirus survival in fresh tropical fruit juices, 1035
Horse meat
Validated digestion assay to detect *Trichinella* larvae in horse meat, 558
Hot water dip
Fludioxonil residues and control of blue and gray mold on pears, 967
Hot water treatments
Hot water treatment decontamination of mung bean seeds, 830
House fly
Enterococcal contamination of food by houseflies, 435
HT-2
LC–TOF-MS analysis of mycotoxins in figs, 1500
Human(s)
Antibiotic resistance of *Campylobacter* isolates from Poland, 602
Virulence genes in *E. coli* O157 and non-O157 isolates, 1774
Human milk
High-pressure processing of human milk, 109
Hydrogen peroxide
UV light–hydrogen peroxide decontamination of lettuce, 903
Hydrolyzable tannin
Q. infectoria as anti–*E. coli* agent, 1223
Hydrophobic grid membrane filter
Salmonella identification and strain differentiation by HGMF-IR, 2249
Hydroponics
Microbiological profile of hydroponic tomatoes, 60
Salmonella on hydroponic tomatoes, 676
Hydrosol
Extending shelf life of fish, 218
Hygiene
Bacteriological safety in São Jorge cheese manufacture, 986
Domestic refrigeration practices, 1898
Hygiene indicator
Risk factors for *Salmonella* and hygiene indicators in pig slaughterhouses, 1320
Hygiene indicator criteria
Hygiene indicator criteria for meat in Belgium, 35
Hypoosmolarity
Low-salinity stress in *V. vulnificus*, 416

Ice
Transfer of *E. coli* O157:H7 to lettuce from ice, 252
Icing
Icing to control *V. vulnificus* and *V. parahaemolyticus*, 1475
Identification
Identification of *Salmonella* serotypes by PCR-RFLP, 2217
Salmonella identification and strain differentiation by HGMF-IR, 2249
IgE-binding

Hydrolysates of β-lactoglobulin with low IgE binding, 1453
IgG-binding
Hydrolysates of β-lactoglobulin with low IgE binding, 1453
Immunoaffinity column
Rapid methiod used to analyze Ochratoxin A, 2133
Immunoassay drug test kits
Efficacy of drug test kits for adulterated food, 1007
Immunocapture
Detection of *Campylobacter* spp., 2543
Immunochromatography strip test
Enhanced rapidity for *L. monocytogenes* detection, 781
Immunohistochemistry
Detection of DRG in advanced meat recovery product, 2307
Immunomagnetic bead
Enhanced rapidity for *L. monocytogenes* detection, 781
Immunomagnetic separation
Fecal versus RAMS detection of *E. coli* O157:H7, 691
Immunomodulatory activity
Immunomodulatory activity of lactococci, 2124
Inactivation
Decontamination of *E. coli* with ozone, 914
Hot water treatment decontamination of mung bean seeds, 830
HPP inactivation of FCV, 1598
Survival of murine norovirus 1 on onions and spinach, 1590
Inactivation curve
Bacterial reduction in UV irradiated chill brines, 629
Incubation temperature
Effect of incubation temperature on APCs, 373
Indicator organisms
Microbiological quality of sushi, 860
Indicators
Surrogates for *Salmonella* in meat, 714
Inducible enzyme
M. morganii ornithine decarboxylase, 657
Infant formula
Thermal resistance of *F. tularensis*, 2208
Infection
UV-light inactivation of viruses on fresh produce, 908
Infective dose
Infective doses and pathogen carriage, 2339
Infiltration
Salmonella migration into almonds, 397
Infrared
Decontamination of almonds with infrared heat, 897
Infrared microspectroscopy
Salmonella identification and strain differentiation by HGMF-IR, 2249
Infrared spectroscopy
Salmonella identification and strain differentiation by HGMF-IR, 2249
Inhibition
Identification of AI-2 inhibitors from ground beef, 134
Inoculum preparation
L. monocytogenes on salami during storage, 494
Inspection scores
Foodborne disease outbreaks in the catering industry, 550
Internet
Microbial quality of fish fillets, 1544
Interventions
Antimicrobial interventions for leafy greens, 625
Antimicrobial interventions of bovine heads, 621
Economics of *Campylobacter* control in poultry, 479
Intervention selection
Application of MCDA to a food safety decision-making problem, 2323
Intestines
Lymphoid tissue reduction in bovine small intestines, 1199
In vitro gene expression
In vitro cold shock gene expression in *Vibrio vulnificus*, 157
In vivo toxicity
Reduced toxicity of fumonisin B_1, 2036
Ionic strength
Survival of *E. coli* O157:H7 in acid, 2404

Irradiation
Food use and practices in long-term care facilities, 365
Radiosensitivity of pathogens in ground beef, 516
γ-Irradiation
Combined treatments with irradiation on beef microbiology, 1237
Isolation
Isolation of *Arcobacter* from beef, 850
Prevalence and diversity of *Arcobacter* in the Chech Republic, 719
Italian cheese
Decarboxylating strains in a typical Italian cheese, 205

Japan
A comparison of BSE risk between Japanese and U.S. beef, 802
Japanese clams
Viral contamination in clams, 1689
Juice(s)
SA11 rotavirus survival in fresh tropical fruit juices, 1035
U.S. juice-associated outbreaks, 356

Kimchi
Growth inhibitory effects of kimchi against foodborne pathogens, 325
Kinetic parameters
Survival of *B. cereus* during green olive fermentation, 1393
Kinetics
Inactivation of *B. anthracis* in milk, 333
Knife blades
Listeria transfer from knives to turkey breast, 176
Knives
Effect of different water temperatures on knife decontamination, 1338
Kudoa
Kudoa in Patagonian hakes, 2316

Labeling
Salmonellosis from stuffed chicken products, 2153
Lactic acid
Survival of *E. coli* O157:H7 in acid, 2404
Lactic acid bacteria
Antimicrobial susceptibility of *L. paracasei*, 339
Bioprotective potential of LAB in malting and brewing, 1724
Growth inhibitory effects of kimchi against foodborne pathogens, 325
High-pressure processing of Turkish white cheese, 102
L. monocytogenes biofilms and bacteriocins, 634
Storage stability of freeze-dried lactic acid bacteria, 431
Survival of *B. cereus* during green olive fermentation, 1393
Lactobacillus
Bacteriocin-producing starters in fermented sausages, 1817
Lactobacillus systemic immune functions and bacterial translocation, 796
Low-molecular-weight antiyeast metabolites of a protective culture, 2481
Lactobacillus casei
Antimicrobial susceptibility of *L. paracasei*, 339
Lactobacillus paracasei
Antifungal activity of *L. paracasei*, 2213
Lactobacillus pentosus
Effects of chloride salts on microbial growth, 1412
Lactobacillus plantarum
Antimicrobial synergy between high pressure and Red No. 3, 1861
Survival of *L. monocytogenes* in dry sausage, 1550
Lactococcus lactis
Immunomodulatory activity of lactococci, 2124
Nisin Z production in *L. lactis*, 2024
Lactoferrin
Antimicrobial activity of lactoferrin, 319
Bactericidal effect of lactoferrin and its derivatives, 2468
β-Lactoglobulin
Hydrolysates of β-lactoglobulin with low IgE binding, 1453
Immunoreactivity of irradiated milk and whey samples, 1270
Lairage
E. coli O157:H7 and *Salmonella* in lairages, 1752
Effect of transportation and lairage on risk of *S. enterica* in cattle, 2228

Impact of transportation and lairage on *E. coli* O157:H7 in cattle, 1114
Lateral flow
Screening clenbuterol by strip and ELISA, 865
Latex gloves
Latex glove use by food handlers, 2334
Latex sensitization
Latex glove use by food handlers, 2334
Lauric acid
Poultry skin flora after successive washings, 1707
Laying hens
L. monocytogenes in poultry flocks, 1996
Leafy greens
Antimicrobial interventions for leafy greens, 625
E-beam radiation for reducing pathogens in spinach, 2415
Leafy vegetable
Impact of water reuse in fresh-cut washing, 2514
Legislation
Regulation of safety of probiotics, 1734
Lethality
Controlling pathogens in beef jerky, 918
Lettuce
Survival of *E. coli* O157 on lettuce, 2384
UV light–hydrogen peroxide decontamination of lettuce, 903
Virus adsorption to lettuce, 522
Leuconostoc spp.
LAB spoilage of vegetable sausages, 2312
Lipid oxidation
Acidified sodium chlorite treatment of trout fillets, 973
Lipodepsipeptide
In vitro digestion and bioavailability of LDPs, 979
Lipolysis
Enterococci in spontaneous sausage fermentation, 1244
Liquid chicken egg
Detection of risin in foods, 2053
Liquid chromatography
Efficacy of drug test kits for adulterated food, 1007
LC–TOF-MS analysis of mycotoxins in figs, 1500
Liquid chromatography–mass spectroscopy (LC-MS)
LC-UV-MS method for DON, DON-3-glucoside, and pigment, 1205
Liquid chromatography–tandem mass spectrometry (LC-MS-MS)
Ochratoxin A in wine, 1038
Liquid culture
Antifungal activity of *L. paracasei*, 2213
Liquid egg
Thermal inactivation of bacteria in liquid egg, 1988
Liquid whole egg
Inactivation of *Salmonella* Senftenberg 775W by UHPH, 2283
Listeria
Antimicrobial efficacy and sensory acceptability of plant essential oils, 1846
Bacteriocin-producing starters in fermented sausages, 1817
Listeria and *Enterobacteriaceae* in domestic refrigerators, 608
Listeria spp. in farmstead cheese processing environments, 2239
L. monocytogenes inactivation by AS-48, 2460
L. monocytogenes in cull sows and pork, 545
L. monocytogenes sprout colonization and stress response, 1556
Risk assessment of *Listeria* in ready-to-eat chicken production line, 946
Survival of *L. innocua* in dairy products, 742
Listeria innocua
Altered cell composition in stress-adapted *L. innocua*, 182
Listeria monocytogenes
Antimicrobial essential oils against *L. monocytogenes* in pork, 502
Antimicrobial interventions for leafy greens, 625
Antimicrobial resistance in poultry bacteria, 2537
Antimicrobial synergy between high pressure and Red No. 3, 1861
Antimycotics and diacetate in RTE meats, 1386
Consumer assessment of safety/date labeling on RTE meat products, 70
Contribution of sigma B factor in alkali tolerance in *L. monocytogenes*, 1481
Controlling pathogens in beef jerky, 918
Control of *L. monocytogenes* on frankfurters, 728
CO_2 influence on *L. monocytogenes* growth, 1915
Distinguishable control strains for food microbiology testing, 2301
E-beam radiation of dry-cured ham, 2001
Enhanced rapidity for *L. monocytogenes* detection, 781
Enterococci in spontaneous sausage fermentation, 1244
Epidemiologic relevance of MVLST, 2559
Estimating *L. monocytogenes* growth kinetics parameters in frankfurters, 1806
Heat shock induces barotolerance in *L. monocytogenes*, 426
High-pressure processing of Turkish white cheese, 102
High-pressure treatment of *L. monocytogenes* in smoked salmon, 1612
Listeria inactivation affected by sequences of stresses, 1169
Listeria transfer from knives to turkey breast, 176
L. monocytogenes adhesion and viability, 1379
L. monocytogenes biofilms and bacteriocins, 634
L. monocytogenes growth at low temperature, 420
L. monocytogenes HHP inactivation, 2007
L. monocytogenes in drain pipes, 66
L. monocytogenes in poultry flocks, 1996
L. monocytogenes in produce processing, 735
L. monocytogenes on salami during storage, 494
Microbiology of sweet potato puree, 639
Modeling *L. monocytogenes* in pasteurized vanilla cream, 1828
Natural antimicrobial combinations against *L. monocytogenes*, 2105
Neural networks and survival of *L. monocytogenes* in soft cheese, 750
Pathogen incidence in raw milk, 1580
Radiation D_{10}-values of *L. monocytogenes* on catfish and tilapia, 2278
Salmonella and *L. monocytogenes* in ready-to-eat food, 855
Sandwiches from health care establishments, 309
Stainless steel surface roughness and finish, 170
Superchilled storage of cold-smoked salmon, 2198
Survival of *L. monocytogenes*, 1835
Survival of *L. monocytogenes* in a gastrointestinal model, 2014
Survival of *L. monocytogenes* in dry sausage, 1550
Survival of *L. monocytogenes* on surface-mold-ripened soft cheese, 1563
U.S. FDA regulatory management of human listeriosis, 1277
Virulence of persistent *L. monocytogenes* in pregnant guinea pigs, 1028
Listeriosis
Virulence of persistent *L. monocytogenes* in pregnant guinea pigs, 1028
Liver
Isolation of *C. jejuni* from bovine bile, 1228
Liza species
Safety and quality assessment of lagoon grey mullets, 2572
Logistic model
Factors for produce contamination, 2389
Logistic slaughter
Contamination of carcasses with *Salmonella* during poultry slaughter, 146
Long-chain polyphosphates
Antibacterial effects of polyphosphates, 1401
Long-term care facilities
Food use and practices in long-term care facilities, 365
Low-fat milk
Detection of risin in foods, 2053
Low-income consumers
Consumer food safety knowledge and behaviors, 1651
Low molecular weight
Low-molecular-weight antiyeast metabolites of a protective culture, 2481
Low pressure
New sterilization process for aseptic packaging, 2119
Low water activity
Reduction of *Salmonella* Enteritidis on almonds by high-pressure water, 825
Lymph node
Salmonella prevalence in bovine lymph nodes, 1685
Lysozome
Active packaging, 119

Antibacterial activity of dextran-conjugated lysozyme in cheese curd, 411

Macrophage
Lactobacillus systemic immune functions and bacterial translocation, 796
Macruronus magellanicus
Kudoa in Patagonian hakes, 2316
Magnesium chloride
Effects of chloride salts on microbial growth, 1412
Magnetic bead
Enhanced rapidity for *L. monocytogenes* detection, 781
Malic acid
Essential oils in coatings for fresh-cut apples, 1150
Malt
Bioprotective potential of LAB in malting and brewing, 1724
Occurrence of bound deoxynivalenol in Fusarium-infected barley, 1266
Mango
Decontamination of mango and melon by gas plasma, 302
Plasma inactivation of bacteria migrating through fruits, 1619
Mannoprotein
Ochratoxin A adsorption by yeast, 1496
Manure
Determining *E. coli* O157:H7 levels in manures and soil, 2233
Manure-amended soils
Determining *E. coli* O157:H7 levels in manures and soil, 2233
Marinade
Salmonella migration into marinated Turkey, 153
Marination
Heat inactivation of *E. coli* O157:H7 in nonintact beef, 1349
Mass spectrometry
LC–TOF-MS analysis of mycotoxins in figs, 1500
Mathematical models
Storage stability of freeze-dried lactic acid bacteria, 431
Maturation time
Toxoplasma in ready-to-eat smallgoods, 1442
Maturity
Salmonella in tomatoes, 1572
Meat
Blade tenderization of beef containing *E. coli*, 2190
Control of airborne microorganisms in meat processing, 1922
Effect of different water temperatures on knife decontamination, 1338
Thermal inactivation of viruses in chicken meat, 1214
Meat-filled pastry
Control of *C. perfringens* in Tajik sambusa, 77
Meat microbiology
Predictive microbiology, 6
Meat processing
Surrogates for *Salmonella* in meat, 714
Meat products manufacturing
Predictive microbiology, 6
Meat safety
On-farm meat safety, 1919
Melamine
Detection of melamine, 590
Melon
Decontamination of mango and melon by gas plasma, 302
Plasma inactivation of bacteria migrating through fruits, 1619
Mercury
Mercury in bluefin tuna, 595
Merluccius australis
Kudoa in Patagonian hakes, 2316
Merluccius hubbsi
Kudoa in Patagonian hakes, 2316
Meta-analysis
Application of meta-analysis in food safety, 1330
Metabiosis
Metabolic effects of *Fusarium*, 1366
Metabiotic interactions
Proteolytic activity of molds, 2129
Methicillin
*mec*A–positive *Staphylococcus* spp. in raw milk, 186
Methylation analysis
Cellulose production in *E. sakazakii* biofilms, 13
MFO-3 method
Alkaline phosphates in cow's, goat's, and sheep's milk, 1884
Microalgae
Antimicrobial activity of *D. salina* extracts, 2138
Microarray
Antimicrobial resistance and virulence in enterococci, 760
Detection and genotyping noroviruses using DNA microarrays, 1434
Toxin expression in O157 lineages, 1673
Microbial contamination
Microbiological quality of Australian retail raw meat, 1232
Microbiological quality of chicken meat, 1123
Microbial destruction
Modification of the submerged coil, 775
Microbial flora
Combined treatments with irradiation on beef microbiology, 1237
Microbial growth
Impact of water reuse in fresh-cut washing, 2514
Microbial inactivation
Decontamination of mango and melon by gas plasma, 302
High-pressure processing of human milk, 109
High-pressure processing of Turkish white cheese, 102
Plasma inactivation of bacteria migrating through fruits, 1619
Microbial internalization
Plasma inactivation of bacteria migrating through fruits, 1619
Microbial population
Grouping of food isolated bacteria by PCR-SSCP in food, 839
Microbial spoilage
Microbial spoilage of rutab, 1406
Microbiological indices
Safety and quality assessment of lagoon grey mullets, 2572
Microbiological quality
Microbial quality in mineral waters, 1253
Microbial quality of stuffed mussels, 616
Microbiological quality of sushi, 860
Sandwiches from health care establishments, 309
Microbiology
Bacteriological safety in São Jorge cheese manufacture, 986
Factors for produce contamination, 2389
On-farm meat safety, 1919
Micrococcaceae
Bacteriological safety in São Jorge cheese manufacture, 986
Microsporidia
Parasite inactivation by chlorine dioxide, 2410
Microwaveable
Salmonellosis from stuffed chicken products, 2153
Migration
Salmonella migration into almonds, 397
Salmonella migration into marinated Turkey, 153
Mild acidification
Microbiology of sweet potato puree, 639
Milk
Alkaline phosphates in cow's, goat's, and sheep's milk, 1884
Antibiotics in milk, 1193
Heat shock induces barotolerance in *L. monocytogenes*, 426
Milkfat globule membranes
Antibacterial milkfat globule membrane fractions, 126
Minced pork
Antimicrobial essential oils against *L. monocytogenes* in pork, 502
Mineral water
Microbial quality in mineral waters, 1253
Modeling
CO_2 influence on *L. monocytogenes* growth, 1915
Modeling the effect of sublethal history, 279
Modeling the growth of *Salmonella* in poultry, 2429
Neural networks and survival of *L. monocytogenes* in soft cheese, 750
Modified atmosphere packaging (MAP)

Combined treatments with irradiation on beef microbiology, 1237
CO_2 influence on *L. monocytogenes* growth, 1915
Proteolytic *C. botulinum* in rice at low pH, 468
Radiosensitivity of pathogens in ground beef, 516
Spoilage and safety characteristics of ground beef, 293
Y. enterocolitica in ground pork packaged under modified atmospheres, 845
Molds
Efficient fungal DNA extraction method for RAPD-PCR, 2497
Survival of *L. innocua* in dairy products, 742
Molecular detection
Effects of reduced enrichment volumes, 1768
Molecular typing
Detection and genotyping noroviruses using DNA microarrays, 1434
Monilinia laxa
Potassium sorbate for controlling postharvest brown rot, 1626
Monitoring
Salmonella prevalence in the broiler supply chain, 1974
Monoclonal antibody
Competitive ELISA to detect bovine blood, 1000
Monolithic column
Rapid methiod used to analyze Ochratoxin A, 2133
Most probable number
Automated MPN determination of *Enterobacteriaceae* in food, 376
MS2 coliphage
UV light–hydrogen peroxide decontamination of lettuce, 903
Multi-criteria decision analysis
Application of MCDA to a food safety decision-making problem, 2323
Multiple antibiotic resistance
Transcription of stx_1, *marA*, and *eaeA* in *E. coli* O157:H7, 1469
Multiple cycles
Multiple-cycle high-pressure treatments, 811
Multiple genes
SSCP analysis for rapid discrimination of *Salmonella* isolates, 1960
Multiplex PCR
Multiplex PCR detection of enterotoxin genes in *Aeromonas* spp., 2094
Prevalence and diversity of *Arcobacter* in the Chech Republic, 719
Multiplication
Salmonella Enteritidis growth on egg yolk membranes, 1905
Multivariate analytical approach
Survival of *B. cereus* during green olive fermentation, 1393
Multi-virulence-locus sequence typing (MVLST)
Epidemiologic relevance of MVLST, 2559
Mung bean seeds
Hot water treatment decontamination of mung bean seeds, 830
Murine norovirus
Survival of murine norovirus 1 on onions and spinach, 1590
Musca domestica
Enterococcal contamination of food by houseflies, 435
Muscle
Danofloxacin in beef muscle, 1720
Muscle tissue
Distribution of drug residues in breast muscle tissues, 223
Mushrooms
Antibacterial activity of mushroom extracts, 1701
Mussels
Analysis of shellfish for *Cryptosporidium* and *Giardia*, 959
Mustard
Combined treatments with irradiation on beef microbiology, 1237
Mycotoxin(s)
Alternaria toxins in wheat, 1262
LC-UV-MS method for DON, DON-3-glucoside, and pigment, 1205
Mycotoxins produced in apples, 1714
Ochratoxin A in wine, 1038
OTA removal procedure for cocoa shells, 1422
Myxosporean
Kudoa in Patagonian hakes, 2316

NaCl stress
Listeria inactivation affected by sequences of stresses, 1169
N-Acyl homoserine lactone
Role of quorum sensing in food spoilage, 1510
Naïve penmates
Fecal pats inoculated with *E. coli* O157:H7 to mimic a super shedder, 648
Nalidixic acid resistance
Distinguishable control strains for food microbiology testing, 2301
Natural antimicrobial
E. coli O157:H7 inhibition in dry sausage by mustard powder, 486
Neural networks
Neural networks and survival of *L. monocytogenes* in soft cheese, 750
Newcastle disease
Thermal inactivation of viruses in chicken meat, 1214
New Zealand
Campylobacter on retail broiler carcasses in New Zealand, 2526
N-Halamine
Rechargeable antimicrobial polyethylene, 2042
Nigella sativa
Influence of extraction methods on *N. sativa* essential oils, 2475
Nisin
Natural antimicrobial combinations against *L. monocytogenes*, 2105
Nisin Z production in *L. lactis*, 2024
Nisin variant
Nisin Z production in *L. lactis*, 2024
Nonintact beef
Heat inactivation of *E. coli* O157:H7 in nonintact beef, 1349
Nonthermal
Dense phase CO_2 processing of spinach, 1015
UV-light inactivation of viruses on fresh produce, 908
Nonthermal plasma
Cold plasma sanitizing of apples, 1357
Norovirus
Detection and genotyping noroviruses using DNA microarrays, 1434
Detection of noroviruses in oysters, 1427
Seasonal binding of recombinant norovirus to GI cells in oysters, 1696
Norovirus binding
Seasonal binding of recombinant norovirus to GI cells in oysters, 1696
Nuggets
Bacteriology of raw chicken nuggets, 613
Nut
Decontamination of almonds with infrared heat, 897
Nutraceutical products
Antibiotic-resistant bacteria in herbal products, 1486
Nutrient effects
Temperature and nutrient effects on *C. jejuni*, 271

Ochratoxin A
Ochratoxin A adsorption by yeast, 1496
Ochratoxin A in wine, 1038
OTA determination in grapes, 2488
OTA removal procedure for cocoa shells, 1422
Rapid methiod used to analyze Ochratoxin A, 2133
Oligosaccharide
Inhibition of pathogen adhesion, 2272
Olympic Games 2004
Risk factors for food premises unsatisfactory inspection results, 1632
On-farm risk factors
Prevalence of *Y. enterocolitica*, 1162
Opportunistic human pathogens
16S rDNA profiling of alfalfa sprouts–associated bacteria, 200
Oral exposure
Virulence of persistent *L. monocytogenes* in pregnant guinea pigs, 1028
Oregano
Combined treatments with irradiation on beef microbiology, 1237
Organic
Antimicrobial resistance in poultry bacteria, 2537
Organic acid preservative
Antimycotics and diacetate in RTE meats, 1386
Organic acids
Survival of *B. cereus* during green olive fermentation, 1393

Organic matter
Impact of water reuse in fresh-cut washing, 2514
Organoleptic properties
Decontamination of *E. coli* with ozone, 914
Outbreak(s)
Reduction of *Salmonella* Enteritidis on almonds by high-pressure water, 825
Salmonellosis from stuffed chicken products, 2153
Oxidative stress
L. monocytogenes sprout colonization and stress response, 1556
Oxygen
Spoilage and safety characteristics of ground beef, 293
Survival of *E. coli* O157:H7 in acid, 2404
Oxytetracycline
Oxytetracycline residue depletion in giant freshwater prawn, 870
Oyster
Detection of noroviruses in oysters, 1427
Seasonal binding of recombinant norovirus to GI cells in oysters, 1696
Ozone
Decontamination of *E. coli* with ozone, 914

Packaging
Campylobacter on retail broiler carcasses in New Zealand, 2526
Packing shed equipment
On-farm contamination of Satsuma mandarin fruit, 530
Packing sheds
Microflora on cantaloupes, 46
Papaya
SA11 rotavirus survival in fresh tropical fruit juices, 1035
Parasite antigens
Anisakis antigens in fish muscle, 1273
Pasteurization
Dense phase CO_2 processing of spinach, 1015
Food use and practices in long-term care facilities, 365
Pasteurized
Survival of *L. monocytogenes* on surface-mold-ripened soft cheese, 1563
Pathogen
Antibiotic resistance in *V. parahaemolyticus*, 2552
Controlling pathogens in beef jerky, 918
Decontamination of almonds with infrared heat, 897
Microbial quality of fish fillets, 1544
Pathogen carriage
Infective doses and pathogen carriage, 2339
Pathogenic bacteria
Antimicrobial activity of lactoferrin, 319
Impact of water reuse in fresh-cut washing, 2514
On-farm contamination of persimmons, 52
On-farm contamination of Satsuma mandarin fruit, 530
Pathogen interventions
E-beam radiation for reducing pathogens in spinach, 2415
Pathogen reduction
E-beam radiation for reducing pathogens in spinach, 2415
Pathogens
Microbiological quality of Australian retail raw meat, 1232
Microbiological quality of chicken meat, 1123
Patulin
LC–TOF-MS analysis of mycotoxins in figs, 1500
Mycotoxins produced in apples, 1714
Sanitizers for inactivation of *P. expansum* on apples, 643
PCR
Detection of *Sarcocystis* parasites in retail beef, 2144
Developing group-specific primers, 2257
Evaluation of *tdc* and its transcript in bacteria and foods, 93
Listeria spp. in farmstead cheese processing environments, 2239
Occurrence of STEC in meat products in Morocco, 2082
PCR detection of *Salmonella* by *stdA* primers, 1108
Salmonella detection methods on turkey parts, 386
S. aureus and Domiati cheese, 2567
Toxin expression in O157 lineages, 1673
PCR detection
DNA extraction for PCR detection of food pathogens, 2110
PCR–restriction fragment length polymorphism
Identification of *Salmonella* serotypes by PCR-RFLP, 2217
PCR–single-strand conformation polymorphism (PCR-SSCP)
Grouping of food isolated bacteria by PCR-SSCP in food, 839
Peanuts
Microbiology of raw nuts, 402
Pectin
Inhibition of pathogen adhesion, 2272
Penetration
Salmonella Enteritidis growth on egg yolk membranes, 1905
Penicillium expansum
Mycotoxins produced in apples, 1714
Sanitizers for inactivation of *P. expansum* on apples, 643
Pentitol
Xylitol to reduce microbial adhesion, 405
Pepsin digestion
Bactericidal effect of lactoferrin and its derivatives, 2468
Peracetic acid
Peracetic acid mixture as an antimicrobial treatment in poultry, 1119
Sanitizers for inactivation of *P. expansum* on apples, 643
Survival of murine norovirus 1 on onions and spinach, 1590
Pericarp
Decontamination of mango and melon by gas plasma, 302
Persimmons
On-farm contamination of persimmons, 52
Persistence
Virulence of persistent *L. monocytogenes* in pregnant guinea pigs, 1028
Pesticide solution
On-farm contamination of Satsuma mandarin fruit, 530
pH
HPP inactivation of FCV, 1598
Proteolytic *C. botulinum* in rice at low pH, 468
Phage display
Enzyme immunoassay for detection for amygdalin, 2048
Pharmaceuticals
Regulation of safety of probiotics, 1734
Phenotypical tracing
Tracing the origin of coliform bacteria, 1910
Phylogenetic tree
Viral contamination in clams, 1689
Physicochemical properties
Physicochemical properties of *Salmonella*, 2421
Physiology
Physiological response of *B. cereus* to food processing treatments, 2168
Phytopathogens
Survival of *E. coli* O157 on lettuce, 2384
Pig
Risk factors for *Salmonella* and hygiene indicators in pig slaughterhouses, 1320
Time course of infection with *Salmonella* Typhimurium in fattening pigs, 699
Pig carcass
Application of meta-analysis in food safety, 1330
Piglets
Effects of a probiotic culture on performance of weaned piglets, 1797
Pigment
LC-UV-MS method for DON, DON-3-glucoside, and pigment, 1205
Pineapple
SA11 rotavirus survival in fresh tropical fruit juices, 1035
Planktonic
Fourteen-day-old chicken cecal microflora, 1981
Plant-derived compounds
Inactivation of antibiotic-resistant *Campylobacter*, 1145
Plants
L. monocytogenes sprout colonization and stress response, 1556
Plasma sterilization
New sterilization process for aseptic packaging, 2119
Plasma treatment

Active packaging, 119
Polycyclic aromatic hydrocarbon (PAH)
Detection of PAHs in smoked meat, 993
Polyethylene (PE)
Rechargeable antimicrobial polyethylene, 2042
Polyethylene terephthalate (PET)
New sterilization process for aseptic packaging, 2119
Polygalacturonase
Potassium sorbate for controlling postharvest brown rot, 1626
Polymixin-ELISA
Detection of *Salmonella* Enteritidis by polymixin-ELISA, 392
Pork
Application of meta-analysis in food safety, 1330
L. monocytogenes in cull sows and pork, 545
Pork meat
Aerobic plate counts as a measure of HACCP effectiveness, 1248
Postharvest treatment
Icing to control *V. vulnificus* and *V. parahaemolyticus*, 1475
Potassium chloride
Effects of chloride salts on microbial growth, 1412
Potassium lactate
Control of *C. perfringens* in Tajik sambusa, 77
Estimating *L. monocytogenes* growth kinetics parameters in frankfurters, 1806
Potassium sorbate
Potassium sorbate for controlling postharvest brown rot, 1626
Potential sources of contamination
On-farm contamination of persimmons, 52
On-farm contamination of Satsuma mandarin fruit, 530
Poultry
Antimicrobial resistance in poultry bacteria, 2537
Bacteriology of raw chicken nuggets, 613
Contamination of carcasses with *Salmonella* during poultry slaughter, 146
Detection methods for *Campylobacter* spp., 835
Mapping of *Salmonella* contamination on the poultry carcass, 1785
Physicochemical properties of *Salmonella*, 2421
Salmonella prevalence in the broiler supply chain, 1974
Poultry chilling
Peracetic acid mixture as an antimicrobial treatment in poultry, 1119
Poultry processing
Arcobacter spp. in poultry processing, 2533
Poultry skin
Poultry skin flora after successive washings, 1707
Powdered infant formula
Resistance of *E. sakazakii* to desiccation, 940
Powdered infant milk formula
Inactivation of desiccated *E. sakazakii*, 934
Powdered milk
Role of fat content in trapping volatile compounds, 1889
Practicality
Application of MCDA to a food safety decision-making problem, 2323
Prawn
Incidence of *Salmonella* in imported seafood, 1460
Predictive microbiology
Model for growth of *Salmonella* on chicken frankfurters, 1135
Neural networks and survival of *L. monocytogenes* in soft cheese, 750
Survival of *L. monocytogenes*, 1835
Predictive modeling
Predictive microbiology, 6
Pregnancy
Virulence of persistent *L. monocytogenes* in pregnant guinea pigs, 1028
Preharvest food safety
Dust exposure and pathogen increases on cattle hides, 2078
Preservative
L. monocytogenes inactivation by AS-48, 2460
Pressure-thermal processing
Bacillus spore inactivation differences, using two pressurizing fluids, 1186
Prevalence
Application of meta-analysis in food safety, 1330
Arcobacter spp. in poultry processing, 2533
Campylobacter in paired turkey and swine farms, 1791
Campylobacter prevalence in poultry production, 2295
L. monocytogenes in poultry flocks, 1996
Prevalence and diversity of *Arcobacter* in the Chech Republic, 719
Salmonella prevalence in the broiler supply chain, 1974
Probiotics
Antimicrobial susceptibility of *L. paracasei*, 339
Effects of a probiotic culture on performance of weaned piglets, 1797
Immunomodulatory activity of lactococci, 2124
Regulation of safety of probiotics, 1734
Processed food
Tracing the origin of coliform bacteria, 1910
Processed spinach
Coliforms and foodborne pathogens on spinach in packing plants, 2398
Processing surfaces
Electrolyzed water in the food industry, 1934
Process validation
Surrogates for *Salmonella* in meat, 714
Produce
Dense phase CO_2 processing of spinach, 1015
E. coli O157:H7 enrichment in produce, 139
Factors for produce contamination, 2389
L. monocytogenes in produce processing, 735
UV-light inactivation of viruses on fresh produce, 908
Production equipment
Allergen cross-contamination in the manufacture of fine bakery wares, 2263
Propionibacterium
Low-molecular-weight antiyeast metabolites of a protective culture, 2481
Protein expression
Protein expression in stressed *V. parahaemolyticus*, 2589
Proteolysis
Enterococci in spontaneous sausage fermentation, 1244
Hydrolysates of β-lactoglobulin with low IgE binding, 1453
Lactobacillus for gluten and phytate hydrolosis in gluten-free bread, 1491
Proteolytic molds
Proteolytic activity of molds, 2129
Pseudomonas florescens
Bactericidal effect of lactoferrin and its derivatives, 2468
Pseudomonas syringae
In vitro digestion and bioavailability of LDPs, 979
Psychrotrophic counts
Acidified sodium chlorite treatment of trout fillets, 973
Pulsed-field gel electrophoresis (PFGE)
Enterococci from human patients and foods, 2100
Enterococci in spontaneous sausage fermentation, 1244
Occurrence of STEC in meat products in Morocco, 2082
PFGE scheme for subtyping *Salmonella*, 2067
Purge-and-trap optimization
Role of fat content in trapping volatile compounds, 1889
Putrescine
M. morganii ornithine decarboxylase, 657
Pyrus communis L.
Fludioxonil residues and control of blue and gray mold on pears, 967

Qualitative microbiological method
BAX system PCR method for *Salmonella* versus Brazil's official method, 2442
Quality assurance
Validated digestion assay to detect *Trichinella* larvae in horse meat, 558
Quantification
L. monocytogenes HHP inactivation, 2007
Quantitative
C. jejuni cross-contamination, 1018
Quercus infectoria
Q. infectoria as anti-*E. coli* agent, 1223

Quorum quenching
Role of quorum sensing in food spoilage, 1510
Quorum sensing
Role of quorum sensing in food spoilage, 1510

Rabbit IgG
Immunoreactivity of irradiated milk and whey samples, 1270
Radial basis function
Neural networks and survival of *L. monocytogenes* in soft cheese, 750
Radial diffusion assay
Potassium sorbate for controlling postharvest brown rot, 1626
Radiation D_{10}-values
Radiation D_{10}-values of *L. monocytogenes* on catfish and tilapia, 2278
Radio frequency electric field (RFEF)
Membrane damage and inactivation of bacteria in apple juice by RFEF, 684
Radiosensitivity
Radiosensitivity of pathogens in ground beef, 516
Radiosensitization
Combined treatments with irradiation on beef microbiology, 1237
Randomly amplified polymorphic DNA–PCR
Efficient fungal DNA extraction method for RAPD-PCR, 2497
Rapid methods
Automated MPN determination of *Enterobacteriaceae* in food, 376
Rapid molecular method
Detection methods for *Campylobacter* spp., 835
Rats
Acute toxicity of rosemary extracts, 790
Raw
Bacteriology of raw chicken nuggets, 613
Raw fish
Microbiological quality of sushi, 860
Raw meat
Campylobacter spp. in raw and ready-to-eat foods, 2087
Occurrence of STEC in meat products in Morocco, 2082
Raw milk
Campylobacter spp. in raw and ready-to-eat foods, 2087
Pathogen incidence in raw milk, 1580
Predicting *Salmonella* prevalence in a dairy herd, 1967
Survival of *L. monocytogenes* on surface-mold-ripened soft cheese, 1563
Raw poultry
Modeling the growth of *Salmonella* in poultry, 2429
Ready-to-eat food
Campylobacter spp. in raw and ready-to-eat foods, 2087
Enterococcal contamination of food by houseflies, 435
Salmonella and *L. monocytogenes* in ready-to-eat food, 855
Ready-to-eat meat
Killing *E. coli* O157 with high pressure processing, 2182
Ready-to-eat meat products
Consumer assessment of safety/date labeling on RTE meat products, 70
Ready-to-eat poultry products
Consumer assessment of safety/date labeling on RTE meat products, 70
Real-time PCR (RT-PCR)
Detection of *Campylobacter* spp., 2543
Detection of central nervous system tissues in meat products, 2059
Detection of noroviruses in oysters, 1427
Detection of *Salmonella* by PCR in foods, 2436
Prevalence of *Y. enterocolitica*, 1162
Real-time PCR quantitative detection of bovine DNA in feedstuffs, 564
Recalls
U.S. FDA regulatory management of human listeriosis, 1277
Recontamination
Survival of *L. monocytogenes* on surface-mold-ripened soft cheese, 1563
Rectoanal mucosal swab (RAMS)
Fecal versus RAMS detection of *E. coli* O157:H7, 691
Refrigerated storage
Salmonella Enteritidis in eggs, 2073
Refrigerators
Listeria and *Enterobacteriaceae* in domestic refrigerators, 608
Regulations
U.S. juice-associated outbreaks, 356
Regulators
L. monocytogenes growth at low temperature, 420
Regulatory Fish Encyclopedia
DNA barcoding and the *Regulatory Fish Encyclopedia*, 210
Regulatory science
DNA barcoding and the *Regulatory Fish Encyclopedia*, 210
Residuals
Evaluation of a copper sulfate–based commercial disinfectant, 226
Residue(s)
Fludioxonil residues and control of blue and gray mold on pears, 967
Oxytetracycline residue depletion in giant freshwater prawn, 870
Resistance
Antibiotic resistance of *Campylobacter* isolates from Poland, 602
Antibiotic-resistant bacteria in herbal products, 1486
Effects of interventions on MDR *Salmonella*, 2177
Salmonella prevalence in bovine lymph nodes, 1685
Restaurant inspection
Risk factors for food premises unsatisfactory inspection results, 1632
Retail
Campylobacter on retail broiler carcasses in New Zealand, 2526
Microbial quality of fish fillets, 1544
Retail beef
Isolation of *Arcobacter* from beef, 850
Retail food
Antimicrobial resistance and virulence in enterococci, 760
Retail food services
Hand washing frequencies and procedures, 1641
Retail meat
Microbiological quality of Australian retail raw meat, 1232
Reverse transcriptase PCR
Detection and genotyping noroviruses using DNA microarrays, 1434
Viral contamination in clams, 1689
rfbE$_{O157}$
Prevalence of *E. coli* O157:H7 in vegetables, 816
Ribotype
Distinguishable control strains for food microbiology testing, 2301
Listeria spp. in farmstead cheese processing environments, 2239
Rice
V. cholerae survival on different types of cooked rice, 2453
Ricin
Detection of risin in foods, 2053
Ricin and abrin in beverages, 1875
Ring trial
Microscopic method for animal constituents detection in feedstuffs, 578
Ripeness
Salmonella in tomatoes, 1572
Risk assessment
CO_2 influence on *L. monocytogenes* growth, 1915
Risk assessment for STEC in unpasteurized milk, 257
Risk assessment of *Listeria* in ready-to-eat chicken production line, 946
Survival of *L. monocytogenes*, 1835
Risk factors
Risk factors for food premises unsatisfactory inspection results, 1632
Risk factors for *Salmonella* and hygiene indicators in pig slaughterhouses, 1320
Romaine lettuce
Transfer of *E. coli* O157:H7 to lettuce from ice, 252
Rosemary extracts
Acute toxicity of rosemary extracts, 790
Rotavirus
SA11 rotavirus survival in fresh tropical fruit juices, 1035
Rules
U.S. juice-associated outbreaks, 356
Rutab
Microbial spoilage of rutab, 1406

Saccharomyces cerevisiae

Effects of chloride salts on microbial growth, 1412
Safety
Microbial quality of fish fillets, 1544
Microbial quality of stuffed mussels, 616
Safety labeling
Consumer assessment of safety/date labeling on RTE meat products, 70
Salami
Killing *E. coli* O157 with high pressure processing, 2182
Survival of *L. monocytogenes* in a gastrointestinal model, 2014
Salinity
Low-salinity stress in *V. vulnificus*, 416
Salmonella
Antimicrobial interventions for leafy greens, 625
Application of meta-analysis in food safety, 1330
Bacteriology of raw chicken nuggets, 613
Campylobacter on retail broiler carcasses in New Zealand, 2526
Cold plasma sanitizing of apples, 1357
Coliforms and foodborne pathogens on spinach in packing plants, 2398
Contamination of carcasses with *Salmonella* during poultry slaughter, 146
Controlling pathogens in beef jerky, 918
Decontamination of almonds with infrared heat, 897
Detection of *Salmonella* by PCR in foods, 2436
Detection of *Salmonella* using a simple phage assay, 380
Distinguishable control strains for food microbiology testing, 2301
Dust exposure and pathogen increases on cattle hides, 2078
E-beam radiation for reducing pathogens in spinach, 2415
E. coli O157:H7 and *Salmonella* in lairages, 1752
Effects of interventions on MDR *Salmonella*, 2177
Growth of *Salmonella* during sprouting, 888
Heat resistance of *Salmonella* serotypes, 509
Hot water treatment decontamination of mung bean seeds, 830
HPP in combination with antimicrobials, 820
Identification of *Salmonella* serotypes by PCR-RFLP, 2217
Incidence of *Salmonella* in imported seafood, 1460
Microbiological profile of hydroponic tomatoes, 60
Microbiology of raw nuts, 402
Modeling the effect of sublethal history, 279
Modeling the growth of *Salmonella* in poultry, 2429
Multidrug-resistant *Salmonella*, 27
Operational practices associated with foodborne disease outbreaks, 1659
Pathogen incidence in raw milk, 1580
PCR detection of *Salmonella* by *stdA* primers, 1108
Peracetic acid mixture as an antimicrobial treatment in poultry, 1119
Physicochemical properties of *Salmonella*, 2421
Predicting *Salmonella* prevalence in a dairy herd, 1967
Probiotics effect on *E. coli* O157:H7 and *Salmonella* shedding in cattle, 539
Proteolytic activity of molds, 2129
Reduction of hide microbial contamination, 2223
Risk factors for *Salmonella* and hygiene indicators in pig slaughterhouses, 1320
Salmonella and *L. monocytogenes* in ready-to-eat food, 855
Salmonella contamination of food service eggs, 19
Salmonella detection methods on turkey parts, 386
Salmonella identification and strain differentiation by HGMF-IR, 2249
Salmonella in tomatoes, 1572
Salmonella migration into almonds, 397
Salmonella migration into marinated Turkey, 153
Salmonella on hydroponic tomatoes, 676
Salmonella prevalence in bovine lymph nodes, 1685
Salmonella prevalence in the broiler supply chain, 1974
Salmonellosis from stuffed chicken products, 2153
Shedding of foodborne pathogens by Florida cattle, 807
Spoilage and safety characteristics of ground beef, 293
SSCP analysis for rapid discrimination of *Salmonella* isolates, 1960
Surrogates for *Salmonella* in meat, 714
Thermal inactivation of *Salmonella* in turkey breast, 2548
Time course of infection with *Salmonella* Typhimurium in fattening pigs, 699
Salmonella enterica
Effect of transportation and lairage on risk of *S. enterica* in cattle, 2228
Salmonella enterica serovar Enteritidis
Reduction of *Salmonella* Enteritidis on almonds by high-pressure water, 825
Salmonella enterica serovar Senftenberg 775W
Inactivation of *Salmonella* Senftenberg 775W by UHPH, 2283
Salmonella Enteritidis
Detection of *Salmonella* Enteritidis by polymixin-ELISA, 392
Salmonella Enteritidis growth on egg yolk membranes, 1905
Salmonella Enteritidis in eggs, 2073
Thermal inactivation of bacteria in liquid egg, 1988
Salmonella Hadar
PFGE scheme for subtyping *Salmonella*, 2067
Salmonella Heidelberg
PFGE scheme for subtyping *Salmonella*, 2067
Salmonella Kentucky
PFGE scheme for subtyping *Salmonella*, 2067
Salmonella SaintPaul
PFGE scheme for subtyping *Salmonella*, 2067
Salmonella Typhi
Radiosensitivity of pathogens in ground beef, 516
Salmonella Typhimurium DT104
Mapping of *Salmonella* contamination on the poultry carcass, 1785
Model for growth of *Salmonella* on chicken frankfurters, 1135
Salmonellosis
Salmonella contamination of food service eggs, 19
Salt
Toxoplasma in ready-to-eat smallgoods, 1442
Sambusa
Control of *C. perfringens* in Tajik sambusa, 77
Sample pretreatment
Detection of *Campylobacter* spp., 2543
Sandwiches
Sandwiches from health care establishments, 309
Sanitization
Decontamination of almonds with infrared heat, 897
Sanitizer(s)
Efficacy of household products against *Bacillus* spores, 473
Inactivation of *B. anthracis* in milk, 333
L. monocytogenes in drain pipes, 66
Sanitizing
Risk assessment of *Listeria* in ready-to-eat chicken production line, 946
Sanitizers for inactivation of *P. expansum* on apples, 643
Sarcocystis cruzi
Detection of *Sarcocystis* parasites in retail beef, 2144
Sarcocystis hominis
Detection of *Sarcocystis* parasites in retail beef, 2144
Satsuma mandarin
On-farm contamination of Satsuma mandarin fruit, 530
Sausage fermentation
Bacteriocin-producing starters in fermented sausages, 1817
Enterococci in spontaneous sausage fermentation, 1244
Scalder
Evaluation of a copper sulfate–based commercial disinfectant, 226
Scanning electron microscopy
Allergen release by frozen and chilled *Anisakis*, 2578
Seafood
Cooking parameters for safe seafood for consumers, 1287
C. perfringens and *B. cereus* in seafood, 1178
Incidence of *Salmonella* in imported seafood, 1460
Microbiological quality of sushi, 860
Seasonal change
Seasonal binding of recombinant norovirus to GI cells in oysters, 1696
Secretions
Sources of contamination and pathogen excretion from infected persons, 2582
Semifried tuna
Shelf life of coated and semifried tuna, 770
Sensory

Antimicrobial efficacy and sensory acceptability of plant essential oils, 1846
Sensory analysis
Superchilled storage of cold-smoked salmon, 2198
Sequence of stresses
Listeria inactivation affected by sequences of stresses, 1169
Serology
Time course of infection with *Salmonella* Typhimurium in fattening pigs, 699
Serotype(s)
Heat resistance of *Salmonella* serotypes, 509
Identification of *Salmonella* serotypes by PCR-RFLP, 2217
L. monocytogenes in poultry flocks, 1996
Serovars
Salmonella identification and strain differentiation by HGMF-IR, 2249
Sheep
Effect of incubation temperature on APCs, 373
Shelf life
Acidified sodium chlorite treatment of trout fillets, 973
Combined treatments with irradiation on beef microbiology, 1237
Essential oils in coatings for fresh-cut apples, 1150
Estimating *L. monocytogenes* growth kinetics parameters in frankfurters, 1806
Extending shelf life of fish, 218
Shelf life of coated and semifried tuna, 770
Shell eggs
Yeasts from refrigerated commercial shell eggs, 1258
Shellfish
Analysis of shellfish for *Cryptosporidium* and *Giardia*, 959
Detection of noroviruses in oysters, 1427
Effect of HPP on freely suspended and bivalve-associated T7, 345
Shiga toxigenic *E. coli*
Non-O157 STEC from humans, cattle, and food in the United States, 1023
Shiga toxin(s)
Detection of Shiga toxin–producing *E. coli*, 927
STEC and *E. coli* O157 from retail meats in China, 706
Shiga toxin–containing *E. coli* (STEC)
E. coli O157:H7 enrichment in produce, 139
Shrimp
Incidence of *Salmonella* in imported seafood, 1460
Sigma B factor
Contribution of sigma B factor in alkali tolerance in *L. monocytogenes*, 1481
Simulation
A comparison of BSE risk between Japanese and U.S. beef, 802
Single-strand conformation polymorphism
SSCP analysis for rapid discrimination of *Salmonella* isolates, 1960
16S rDNA
Grouping of food isolated bacteria by PCR-SSCP in food, 839
16S rDNA profiling of alfalfa sprouts–associated bacteria, 200
16S rRNA gene
Prevalence and diversity of *Arcobacter* in the Chech Republic, 719
Slaughter cattle
Reduction of microbial contamination on cattle hides, 1343
Slaughterhouse
Risk factors for *Salmonella* and hygiene indicators in pig slaughterhouses, 1320
Smallholder dairy
Risk assessment for STEC in unpasteurized milk, 257
Small subunit rDNA
Kudoa in Patagonian hakes, 2316
Smoked pork
Detection of PAHs in smoked meat, 993
Smoked salmon
High-pressure treatment of *L. monocytogenes* in smoked salmon, 1612
Superchilled storage of cold-smoked salmon, 2198
Sodium benzoate
Antimycotics and diacetate in RTE meats, 1386
Transcription of stx_1, *marA*, and *eaeA* in *E. coli* O157:H7, 1469
Sodium chloride
Antimycotics and diacetate in RTE meats, 1386
Effects of chloride salts on microbial growth, 1412
Sodium diacetate
Antimycotics and diacetate in RTE meats, 1386
Estimating *L. monocytogenes* growth kinetics parameters in frankfurters, 1806
Sodium hypochlorite
Sanitizers for inactivation of *P. expansum* on apples, 643
Soft cheese
Neural networks and survival of *L. monocytogenes* in soft cheese, 750
Survival of *L. monocytogenes* on surface-mold-ripened soft cheese, 1563
Soil
Linking soil quality to human cadmium exposure, 2504
Sorbic acid
Microbiology of sweet potato puree, 639
Sourdough *Lactobacillus*
Lactobacillus for gluten and phytate hydrolosis in gluten-free bread, 1491
Specified risk material
Cross-contamination of CNS tissue due to beef carcass splitting, 83
Lymphoid tissue reduction in bovine small intestines, 1199
Potentially prohibited tissue removal, 573
Spinach
E-beam radiation for reducing pathogens in spinach, 2415
Spin-bar digestion
Validated digestion assay to detect *Trichinella* larvae in horse meat, 558
Spleen
Lactobacillus systemic immune functions and bacterial translocation, 796
Spoilage
Antimicrobial efficacy and sensory acceptability of plant essential oils, 1846
LAB spoilage of vegetable sausages, 2312
Spores
Efficacy of household products against *Bacillus* spores, 473
Heat tolerance of *C. sporogenes* spores, 953
Thermal and hydrostatic inactivation, 196
Sprouting conditions
Growth of *Salmonella* during sprouting, 888
Sprouts
L. monocytogenes sprout colonization and stress response, 1556
Stainless steel
Temperature and nutrient effects on *C. jejuni*, 271
Staphylococcal enterotoxin H
Characteristics of enterotoxin H–producing *S. aureus*, 1855
Staphylococcal food poisoning
Characteristics of enterotoxin H–producing *S. aureus*, 1855
Staphylococci
Poultry skin flora after successive washings, 1707
Staphylococcus
mecA–positive *Staphylococcus* spp. in raw milk, 186
S. aureus and Domiati cheese, 2567
Staphylococcus aureus
Antimicrobial resistance in poultry bacteria, 2537
Detection of *S. aureus*, 191
Pathogen incidence in raw milk, 1580
Sterility testing of an aseptic dispensing valve, 653
Starter culture
Storage stability of freeze-dried lactic acid bacteria, 431
Starvation
Altered cell composition in stress-adapted *L. innocua*, 182
Steamed rice
Proteolytic *C. botulinum* in rice at low pH, 468
Sterility
Sterility testing of an aseptic dispensing valve, 653
Stochastic model
A comparison of BSE risk between Japanese and U.S. beef, 802
Model for growth of *Salmonella* on chicken frankfurters, 1135

Storage
Yeasts from refrigerated commercial shell eggs, 1258
Storage stability
Storage stability of freeze-dried lactic acid bacteria, 431
Street food
Microbial quality of stuffed mussels, 616
Stress
Low-salinity stress in *V. vulnificus*, 416
Structural component
Heat tolerance of *C. sporogenes* spores, 953
Stuffed
Salmonellosis from stuffed chicken products, 2153
Stuffed mussel
Microbial quality of stuffed mussels, 616
Submerged coil
Modification of the submerged coil, 775
Subprimals
Blade tenderization of beef containing *E. coli*, 2190
Subtyping
Evaluation of an automated rep-PCR system, 1372
Subzero temperatures
High-pressure treatment of *L. monocytogenes* in smoked salmon, 1612
Superchilling
Superchilled storage of cold-smoked salmon, 2198
Supercritical fluid extraction
Antimicrobial activity of *D. salina* extracts, 2138
Supercritical fluid extracts
Acute toxicity of rosemary extracts, 790
Super shedder
Fecal pats inoculated with *E. coli* O157:H7 to mimic a super shedder, 648
Surface modification
Rechargeable antimicrobial polyethylene, 2042
Surface-mold-ripened cheese
Survival of *L. monocytogenes* on surface-mold-ripened soft cheese, 1563
Surface roughness
Stainless steel surface roughness and finish, 170
Surrogate
Surrogates for *Salmonella* in meat, 714
Survey
Domestic refrigeration practices, 1898
Survival
Listeria inactivation affected by sequences of stresses, 1169
Listeria transfer from knives to turkey breast, 176
L. monocytogenes on salami during storage, 494
Neural networks and survival of *L. monocytogenes* in soft cheese, 750
Survival of *L. innocua* in dairy products, 742
Survival of *L. monocytogenes*, 1835
Survival of murine norovirus 1 on onions and spinach, 1590
V. cholerae survival on different types of cooked rice, 2453
Survival rate
Storage stability of freeze-dried lactic acid bacteria, 431
Survival studies
SA11 rotavirus survival in fresh tropical fruit juices, 1035
Susceptibility
Susceptibility of *Arcobacter* spp. to aromatic compounds, 165
Sushi
Microbiological quality of sushi, 860
Sweet potato puree
Microbiology of sweet potato puree, 639
Swine
Campylobacter in paired turkey and swine farms, 1791
L. monocytogenes in cull sows and pork, 545
Swine liver
Screening clenbuterol by strip and ELISA, 865
SYBR Green
Real-time PCR quantitative detection of bovine DNA in feedstuffs, 564
Table olives
Effects of chloride salts on microbial growth, 1412
Tail muscle
Mercury in bluefin tuna, 595
Tailing
L. monocytogenes HHP inactivation, 2007
Tajikistan
Control of *C. perfringens* in Tajik sambusa, 77
Tandem mass spectrometry
Efficacy of drug test kits for adulterated food, 1007
TaqMan
Detection of noroviruses in oysters, 1427
$TCID_{50}$ (50% tissue culture infective dose)
UV-light inactivation of viruses on fresh produce, 908
tdc
Evaluation of *tdc* and its transcript in bacteria and foods, 93
tdc expression
Evaluation of *tdc* and its transcript in bacteria and foods, 93
Temperature
Effect of different water temperatures on knife decontamination, 1338
L. monocytogenes growth at low temperature, 420
Modeling the growth of *Salmonella* in poultry, 2429
Salmonella Enteritidis in eggs, 2073
Temperature and nutrient effects on *C. jejuni*, 271
Toxoplasma in ready-to-eat smallgoods, 1442
TEMPO system
Automated MPN determination of *Enterobacteriaceae* in food, 376
Tenax
Role of fat content in trapping volatile compounds, 1889
Tenderization
Blade tenderization of beef containing *E. coli*, 2190
Heat inactivation of *E. coli* O157:H7 in nonintact beef, 1349
Terrorism
Efficacy of drug test kits for adulterated food, 1007
Test-and-hold
Effects of reduced enrichment volumes, 1768
tet(M) gene
Antimicrobial susceptibility of *L. paracasei*, 339
Thai fermented foods
Nisin Z production in *L. lactis*, 2024
Thailand
Deoxynivalenol contamination in wheat products, 1931
Thermal death time
Modification of the submerged coil, 775
Thermal history
Modeling the effect of sublethal history, 279
Thermal inactivation
Facilitated thermal inactivation of *E. coli* O157:H7, 1604
Heat inactivation of *E. coli* O157:H7 in nonintact beef, 1349
Inactivation of desiccated *E. sakazakii*, 934
Thermal and hydrostatic inactivation, 196
Thermal inactivation of *Salmonella* in turkey breast, 2548
Thermal inactivation of viruses in chicken meat, 1214
Thermal resistance of *F. tularensis*, 2208
Thermal stability studies
Detection of risin in foods, 2053
Thermostability
Antibiotics in milk, 1193
Thermotolerance
Modeling the effect of sublethal history, 279
Thinning
Campylobacter in thinning of broiler flocks, 264
Thymol
T. vulgaris and a stored food mite, 351
Thymoquinone
Influence of extraction methods on *N. sativa* essential oils, 2475
Thymus vulgaris
T. vulgaris and a stored food mite, 351
Tilapia
Radiation D_{10}-values of *L. monocytogenes* on catfish and tilapia, 2278

Time to growth (TTG)
Antimycotics and diacetate in RTE meats, 1386
Tomato
Metabolic effects of *Fusarium*, 1366
Microbiological profile of hydroponic tomatoes, 60
Salmonella in tomatoes, 1572
Salmonella on hydroponic tomatoes, 676
Tomato juice
Proteolytic activity of molds, 2129
Toxicity
Ricin and abrin in beverages, 1875
Toxin
Toxin expression in O157 lineages, 1673
Transmission electron microscopy
Heat tolerance of *C. sporogenes* spores, 953
Transportation
Effect of transportation and lairage on risk of *S. enterica* in cattle, 2228
Impact of transportation and lairage on *E. coli* O157:H7 in cattle, 1114
Trends
Salmonella prevalence in the broiler supply chain, 1974
Trichinella
Validated digestion assay to detect *Trichinella* larvae in horse meat, 558
Trifluoroacetic acid
Occurrence of bound deoxynivalenol in Fusarium-infected barley, 1266
T7 virus
Effect of HPP on freely suspended and bivalve-associated T7, 345
Turkey
Campylobacter in paired turkey and swine farms, 1791
Campylobacter prevalence in poultry production, 2295
Modeling the effect of sublethal history, 279
Salmonella detection methods on turkey parts, 386
Salmonella migration into marinated Turkey, 153
Thermal inactivation of *Salmonella* in turkey breast, 2548
Turkey meat
Antimicrobial resistance and class 1 integrons in *E. coli*, 1679
Turkish white cheese
High-pressure processing of Turkish white cheese, 102
12S rRNA
Real-time PCR quantitative detection of bovine DNA in feedstuffs, 564
Typing
L. monocytogenes in produce processing, 735
Superchilled storage of cold-smoked salmon, 2198
Tyrophagus putrescentiae
T. vulgaris and a stored food mite, 351
Tyrosine decarboxylase
Evaluation of *tdc* and its transcript in bacteria and foods, 93

Ultrahigh pressure
Antimicrobial synergy between high pressure and Red No. 3, 1861
Ultrahigh pressure homogenization (UHPH)
Inactivation of *Salmonella* Senftenberg 775W by UHPH, 2283
Ultrasound
L. monocytogenes in drain pipes, 66
United States
A comparison of BSE risk between Japanese and U.S. beef, 802
Non-O157 STEC from humans, cattle, and food in the United States, 1023
Unpasteurized milk
mecA–positive *Staphylococcus* spp. in raw milk, 186
U.S. Food and Drug Administration
U.S. FDA regulatory management of human listeriosis, 1277
UV
UV-light inactivation of viruses on fresh produce, 908
UV-absorbing substances
Membrane damage and inactivation of bacteria in apple juice by RFEF, 684
Thermal inactivation of bacteria in liquid egg, 1988
UV light
UV light–hydrogen peroxide decontamination of lettuce, 903

Validation
BAX system PCR method for *Salmonella* versus Brazil's official method, 2442
Cleaning and validation to prevent allergen cross-contact, 445
Controlling pathogens in beef jerky, 918
Model for growth of *Salmonella* on chicken frankfurters, 1135
Validated digestion assay to detect *Trichinella* larvae in horse meat, 558
Vanilla cream
Modeling *L. monocytogenes* in pasteurized vanilla cream, 1828
Variety
Salmonella in tomatoes, 1573
Vegetables
E. coli O157:H7 enrichment in produce, 139
Factors for produce contamination, 2389
Prevalence of *E. coli* O157:H7 in vegetables, 816
Survival of murine norovirus 1 on onions and spinach, 1590
Water disinfection from the fresh-cut vegetable industry, 286
Vegetable sausage
LAB spoilage of vegetable sausages, 2312
Vegetative cells
Physiological response of *B. cereus* to food processing treatments, 2168
Verocytotoxin
Q. infectoria as anti–*E. coli* agent, 1223
Verotoxin
STEC and *E. coli* O157 from retail meats in China, 706
Viability
L. monocytogenes adhesion and viability, 1379
Vibrio
Antibiotic resistance in *V. parahaemolyticus*, 2552
Vibrio cholerae
V. cholerae survival on different types of cooked rice, 2453
Vibrio parahaemolyticus
Icing to control *V. vulnificus* and *V. parahaemolyticus*, 1475
Protein expression in stressed *V. parahaemolyticus*, 2589
Vibrio vulnificus
Icing to control *V. vulnificus* and *V. parahaemolyticus*, 1475
In vitro cold shock gene expression in *Vibrio vulnificus*, 157
Low-salinity stress in *V. vulnificus*, 416
Virulence
Campylobacter prevalence in poultry production, 2295
Virulence factor
Antimicrobial resistance and virulence in enterococci, 760
Enterococci from human patients and foods, 2100
Transcription of stx_1, *marA*, and *eaeA* in *E. coli* O157:H7, 1469
Virulence genes
Epidemiologic relevance of MVLST, 2559
Regulation of safety of probiotics, 1734
Virulence genes in *E. coli* O157 and non-O157 isolates, 1774
Virus
Thermal inactivation of viruses in chicken meat, 1214
Vitelline membrane
Salmonella Enteritidis growth on egg yolk membranes, 1905

Washing
Coliforms and foodborne pathogens on spinach in packing plants, 2398
Survival of murine norovirus 1 on onions and spinach, 1590
Water disinfection from the fresh-cut vegetable industry, 286
Water
Effect of different water temperatures on knife decontamination, 1338
Water medication
Sulfamethazine water medication pharmacokinetics and contamination, 584
Water pressurization
Reduction of *Salmonella* Enteritidis on almonds by high-pressure water, 825
Water-soluble muscadine seed extracts
Antimicrobial effect of muscadine seed extracts, 1465
Weight of evidence
Application of MCDA to a food safety decision-making problem, 2323

Western blot
Comparison of detection methods for CNST, 1505
Wheat
Alternaria toxins in wheat, 1262
Wheat products
Deoxynivalenol contamination in wheat products, 1931
Whole muscle
Thermal inactivation of *Salmonella* in turkey breast, 2548
WIC participants
Consumer food safety knowledge and behaviors, 1651
Wine
Ochratoxin A adsorption by yeast, 1496
Ochratoxin A in wine, 1038
Rapid methiod used to analyze Ochratoxin A, 2133

Xanthene derivatives
Antimicrobial synergy between high pressure and Red No. 3, 1861
Xanthorrhizol
Antibacterial activity of xanthorrhizol, 1926
Xylitol
Xylitol to reduce microbial adhesion, 405

Yeast
Ochratoxin A adsorption by yeast, 1496
Yeasts from refrigerated commercial shell eggs, 1258
Yeast cell wall
Ochratoxin A adsorption by yeast, 1496
Yersinia enterocolitica
Prevalence of *Y. enterocolitica*, 1162
Y. enterocolitica in ground pork packaged under modified atmospheres, 845
Yogurt
Survival of *L. innocua* in dairy products, 742
Yolk
Salmonella Enteritidis growth on egg yolk membranes, 1905

Zearalenone
LC–TOF-MS analysis of mycotoxins in figs, 1500
Zoonoses
Non-O157 STEC from humans, cattle, and food in the United States, 1023
z-Value
Heat-resistant fungi from blueberries, 2030
Storage stability of freeze-dried lactic acid bacteria, 431
